ENTERED 25196

11.9. ✓ Schizothecium leucopurum 22.5 x 11

Setae 4 peridochium filled with long hyaline ellipsoid spores  
ca 2 x 1. white. Setae 8 peridochium 2250 x 8

✓ Yellow Saccobolus Asci 112 x 29  
Spore mass 45 x 16 3+3+2 (?)  
Spores 16 x 8 Smooth but immature Citrimus ?

"Volutella"? Setae 260 Setae . Spores 3 x 2

Fingeria developing on (1)? Only hyaline, non-cap  
= Ascobolus pores 3um diam peak  
luteous / branch very to white apo.  
paler with age. St furtraeus

4-6 cracks 19.5-22.5 x 11.2 Asci 275 x 52

Asci faint blue in K.

Chaetomium Spores grey hairs Spores 6 x 5

4/10 P. pleurospora 16-spored ✓ 35 x 19.5

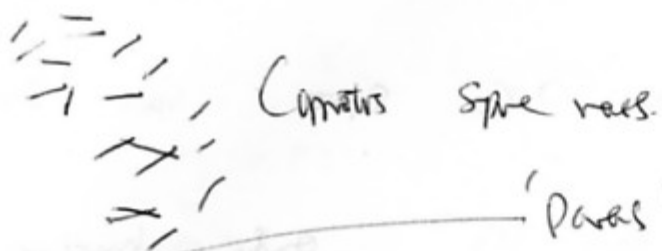

Mycobolus neck 96 x 20 total height 175  
-110 diam 50 P10.

White Apithecium 350 diam firm, with marginal  
erect hairs or probably pores?  
erect polygonal up to 15 diam  
Cephalosporia? 16-spored hyaline ellipsoid 12.5 x 6-7  
Asci 95 x 22.5 operculate 14.5 P10

Spores 5.5-6 x 6-6.5  
 C. uniform key

botrychoides ✓

Ca 24-32 - could be

rough, Ascogonium like, SI tapered

free Ascus 90 x 19.5 x 1

Spore 14-10 x 5-6-7

Septate 4.5 diam

definitely operculate
