ENTERED

299

✓ Sch. lehrmanni

21 x 11.2

heavy perithecia brown fusose

S. spored apical g.p. apical corda, hollow

Spores broad ellipsoid ~~not uniseriate~~

uniseriate 35.3 x 22.5 by 16 x 3 cyl.  
32.1

Asci ca 27 x 32

no discharged spores seen. - let mature.

30/9

Sporomitra

short stalked & cells rounded

heavy

1 x 6

✓ bipartite

Sordaria

broad ellipsoid

32 x 22.5

Podopora

simple primary app + cordae present in asci  
not seen later

Asc cyl/cordate

7 x 2

20 x 32

~~kept to fruiting?~~

uniseriate

glutinous

perithecia fusose hairs below \* also inflated  
egg hairs present

4/10

Sporomitra

41.5 - 48 x 7

✓ ER short stalked
