

Rabbit Harelaw 25.10.96  
NT 16360

54/96

ENTERED

Present when collected 25.10

Vesitiaria fuscata heads 150 137 diam.

Schizothecium Tetraspor 21-22.5 x 11-12.5

Sporomucella GER 61-68-24.5 x 11.2-12.8

Asci 190 x 29.

intermedia

30/10

Dry Aphrospora: (3)4 spores (some more?) with rhizoids  
± globose lead cell  
V. fuscata } Sch. tet } cylindrospore }  
13 diam.

Spores ± 5.5 x 2 with  
2 "diverticula"  
Chains loosely together + attached  
to lead cell via thin filaments  
seen.

1/11

Sch tet  
V. fusc.  
P. cyl.

3.11

Phycomyces to mature. 17.5 x 8 nitens pyriform conidia

Sch tet

4.11

P. fimbriata on 2  
T. stercoraria 240 x 110

21

Ascobolus verrucose minutely 18-21 x 9.5 hawaiiensis  
Asci 22.5 diam base side para 5/6 frond clavate  
-29 PTO

Apothecia small, slightly pinkish / brown excipulum  
 all round masses on spores  
 ca 200 diam

Sch let

6.11 ✓ C. sterzaueri

7.11 ✓ C. miser

19.11 ~~Fruct.~~ Reziza on 14  
 Bth. K+

1.12 Spores on hyphae  
 over disc, which is only  
 4mm diam, but 1cm high  
 14.5-16.5 x 7.7 Asc: 210 x 16  
Imeti

10.

✓ Sch. let

Chaetomium

liviform

Spiral hairs, straight below

Heteromyces

7 x 6

asci 8-spored cylindrical

Schizothecium

29 x 12.5-14.5 8-spored?

good scales

Conium

Myxo? (as on ? 48/96) dark golden brown  
 spores in brittle black "tuccum" 11.5-12.5-18 diam.  
 minutely verrucose, evenly spiculated with 1 base.  
 diam ca 6 diam much var over in shape  
 than 48/96

24.11

Sch. 8-spored ≠ 10 scales

24-26 x 12.5-13

T. ~~sterzaueri~~ sterzaueri

T. polytrichum

Sordaria

imm.

Asci

190 x 23

Spores 17.7-19.3

8-spored

funicola

x 12.5-13

Asciobolus

white, small,

9.3 x 9.6

finely verrucose, gel all round  
~~main axis~~

2.12. Check Coprinus or 19

cord spores / patavillardi?

14.12

Sparingly setae  
multispored 64 (+?)

P. deepices like penicillium

Spores 19-22.5 x 9.5-12.5

Simple appendages, 10  
ca 50 long

ly Arnium  
leporinum

Sch. tetrasporum

Spores 9.5 x 9.5 x 5

cordisporus

22.12

Cop. stercoriorum

Spores Chaetomium

Sch. tetrasporum

Plugs hemispherical grey → black spores  
dark purple brown 12-13 diam. St. asymmetrically lighter  
Smooth
