

Red Deer Cairngorm 26.5.97

28/97

NT 0005 P. Holland

27.5 Sporormiella Asci 175×30 4ER
Cylindrical short stalked.

Spores 51×10 intermediate

30.5 Sp. intermedia

tiny Coprinus ca 150 diam (meristematic white)

Asci clavate, bi-seriate above, ca 65×12.5
spores ellipsoid $9.5-11 \times 4-5$ KI -
lactescens?

Schizothecium S. spread 21 + 11-12
Seeds small but distinct vesticula

5.6 Sch. vesticula ✓

9.6 Aserchus ? or Helonchus ? 340 tall x 110 diam
upper leaf long - leaves 16 long. white
immature.

23.6 good growth - dried asci 60×65
basal 220 spores mature ellipsoid 5.5×3

Cop. stercorarius ✓

Sp. 58×11 4ER intermedia

Cop. leptoneurus ✓

Sch. vesticula

3.7 Coniochaeta Seetigera ✓

23.7

C. Leptomers

C. Sterners

Dried 23.7
