

Poe

Normal Corymbus Bridge

26.5.97

31/97

NR

NH938103

27.5

Sporomniella ?

hired lamp removed

Soe dan.

immature

4 celled spores

cylindrical asc

Spores 4 celled going to be large

7-8 long when immature.

Asci

cylindrical

short

stalked

hirsutis ?

2.6

Rhopalomyces

14.5 - 16

x

9.6 - 11

Spores much too small for

elegans ?

Spicy

mycelial

hyphae

with

clamp connections

9.6

Cecophora ?

immature

23.6

14, 10, 11, 14, 16, 17

Red brown

mycelial

cores

(like Brughia Grove 24/97)  
(Marasmius arc. R.W.)

hairy perithecia

8 spored

ventrose

asci

immature Podospora

Same as 1 or

Cecophora ?

immature spores

ca 55 long.

Sporomniella

4ER

60 x

10

reticulata

3.7

P. apiculata

hirsutis / Capophila

P.O.

Immature

ventrose

asci

check when mature  
P.O. the imm. Arctia

Lot

of

imm

perithecia

keep to make

11.7 Lot of Armin? immbel.

23.7 Lot of brown hairy / larvae perithec

1. 42-48 x 19.5-22.5 Armin app ca 45-50  
8-spored apical.

2.

3. less hairy Armin spores smaller Podopora

black by app. (abnormal?) Head 22.5-20.5 x 12.5  
29 x 4

4. hairy Podopora as above but immbel (?)  
Simple 2y appedages

5. ?

6. hairy Armin 38.5 x 42 x 19.5

7. ?

8. Armin 39 x 22.5 hairy

9. Armin hairy

10. Armin hairy

11. ?

12. ?

A. mardax probably best fit.
