

Roe/Chemoix? ~~La Tour~~ Carax 2.10.97

106/97

2° 59' 0" E 43° 35' 20" N

20.10.

Rhynchosia developing over pellets x paper.

76.10

Telebous ~~stercomus~~

Sordaria

21-19.3 x 12.5-11.5 fimbrata ✓

(?) Pilosus

5-6 x 3

good broad sheath

Umbonatus ✓

Lasidius

Setae up to 180

(?)

Young but spores 1 serate, asci 13 diam

Spores almost spherical v. broad ellipsoid

11.5 x 9.5

31.0

white

Isaria

type

Spiky bodies developing on one

10um long by 5-11.

Ascomata pale brownish/cream

up to 1mm diam

Spores f. close cracked

17.5 x 9.5

cf. serotina?

gel not obvious not in II

(?) Sordaria

26-20.5 x 14.4

± no sheath?
(not in II)

Asci

22.5 diam.

x 225

distinct papilla

Sporomella

imm

4 ER

40 x 7

ambigua ✓

T. ~~stercomus~~

5.11

Presumably white mycelium and

Sordaria
