imm putresca Sordaria?  
Dry fine Piptrochloa

alternating disc + distinct dichotomous so some  
seen ± 4 branched. Brown chrate.

round head cells 6.5 diam. 2 spores  
Spores ca 3.5 x 2 Leptotheca ✓

7.5 P. leptotheca  
Sordaria relatively narrow 21-22.5 x 10.5-11.2  
asci good sheath - sides not parallel.  
ca 13-14 diam. Obliquely 1/2 exserte.  
3/4 wide. alcina ✓

11.5 Imm Yelitschia with white oxidized hyphae.  
imm spores 61 x 19

Sporomucula var 43-45 x 8 asthata ✓

Sordaria alcina Thelebinus rams ✓

(?) Piptrochloa ca 10-15 asci  
125 x 32 Spores ca 5 x 5 more than  
64 spores Thelebinus sterconus ✓

14.5 Xylospheera ✓ Pip. lep. chila

Deltochma 54.5-58-61 x 19-22.5  
furtoranea

Sporomielk var UR-51.5 x 10.5  
-26 } Asci 165 x 26  
intermedia

Golden perithecia with sebaceous ostiole

Clavate asci ca 80 x 16 spores broad fusiform,  
inmate sticky, truncate apical with g.p.s 19.5 x 8

most ostioles secrete up to 60, occasionally 90

18.5  
21.5 Sch. vestitoria ✓ 8 sp. 19.5-21 x 11.2.  
Sphaerodes fimicola  
Melanospore fusiform

27.5 Xylospheera

Podopne Brown hairy perithecia 16 spores decimas type  
with papillate neck. } pleurospora

Sch. vestitoria } Spor. intermedia } Sphaerodes fimicola

Yellow pyrenothecia } Gymnospore neesii

31.5 Sp. intermedia ✓ } G. neesii

46 Coprinus miser ✓ } Sp. antheris } G. neesii  
Sch. vestitoria ✓ } Sphaerodes fimicola
