

Old Sheep Field grazing, Acqua Doria, nr Capo 7/01  
di Moro, Corsica Fr. 41.76°N 8.72°E Cell AMR+MT  
12 April

Incubated 23 April

23.4 - Pilobolus deep orange ellipsoid 11.5-14.5 x 8  
26.4 - some smaller, 1 down to 8 x 5 ✓  
kleinii

25 badly reflected & crumbling by beetle larvae  
- park transplanted

Sporinella 4 ER unsterile asci 160 x 30  
Spores 4.5 x 9 anthera ✓  
dragged some slit

7.5 Podopha polysporous a few sparse simple  
setae at neck, fading towards tip.

asci broad 190-200 x 60

Spores 16 x 11.2 ?  8 long. Some st. spatulate

arranged in spirals when young 64 of none? ✓

Sp. anthera ✓ Setsa ✓

Saccobolus small apothecia < ca 200-250 diam  
3+3+2 Spores 38-35 x 13

Spores grey purple smooth ellipsoid 11.2-12.8 x 6.  
asci 80 x 22 paras hyaline, not capitate  
depauperatus

14.5 Small yellow Saccobolus 4 x 2 ca 350 diam

Spore mass 4.8 x 14-15

Spores truncate, v. minutely verrucate 19 x 8

asci 12.5 x 30

Citrius

18.5 Sch. pow scales, 8-spored, uniseriate

18-19.5 x 9.5-10

Vestibula

Yellow Saccobolus

Citrius ✓

24.5 Sacc Citrius ✓

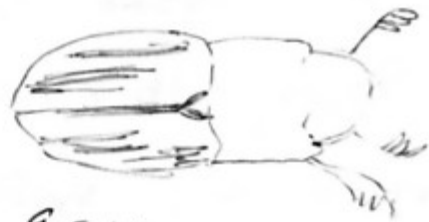

Isotrophus cornutus imatures like blue

16 x 11

Adult beetle present 5mm long - looks like

Aphodius sp. freshwater elytra with dark

linear spots/patches

28.5 T. cornutus ✓ spores

16-18 x 9.5-10

Doined 28.5
