

15.11 Laetobolus hirsute asc 110-115 x 25-26
Spores broad ellipsoid 20-22.5 x 13-13.5
Scler thin. ca 160 kg. unicari ✓

Sp. 4T old ca 65 x 14

19.11 Sordaria 18-19.5 x 12.2 ellipsoid
distinct but thin gel on Spores
discharged on paper fimaria ✓

Laetobolus asp above Spores 21 x 12.5

24.11 Laetobolus ✓

3.12 Sporormiella hypocistis ✓ 48 x 6
-52
disarticulating at central septum. All cells
Same size, equal germ slts.

Sch. Leptosporium ✓

Large immersed pentacem. Immature Sordaria
white. yell. brown Spores 29-32 x 17.5
macrospora ? ✓

8.12 Sch. Leptosporium ✓

17.12 Sch. Leptosporium ✓

S. macrospora ✓ 27-32 x 19-19.5

26.12 Sch. Leptosporium ✓

Coprinus 8-sp. white 'firm' discoid apothecia
 250-300 diam sp ellipsoid 11.5-12.5 x 8
 Asci cylindrical with short foot 90-100 x 17-18
 sp ± biserial. exasperate cells brownish-purplish
 4 8-10, st. brownish. paraphyses narrow
 filiform 1-2 wide, circinate sp. ✓

Sp. 4 ER 40-44 x 8 Diagonal squared hbr
 not kinked g. sh. Asci 125-130 x 22

1.1 Tortuolichthys sp. 21-22.5 x 8 hirsuta ✓
 setae up to 80 long antrax ✓

Coprinus ✓ as above Sch. tetrasporum ✓

9.1 Sch. tetrasporum ✓

Coprinus 8-sp. asci 80 x 14-20
 -100
 Paraphyses filiform, circinate sp. 12.5-13 x 7

23.2 Pleurospora / Sch sp. uniseriate variable in size. 8-sp
 29-32 x 15.5-16 small by app

Some inflated scales at red ca 6 x 2

Armenia 8-sp. symmetrical. - but spores too small? curvuloides
 35-38.5 x 19.5-22

Apophyses without structure, ca 70 long.

No pitted scales
 asci with apical ring, medax

3.3

Ammon

short hairy pectica -

hair not spiky or aggregated

Sp. 42 x 21

nerax ✓

Cynops as before ✓

Torchelitschka

Sp. 21-22.5 x 8-8.5

small

st. papillate

g-pae

hospita ✓

Sp. 4 ER

38.5-41.5 x 7.5-8

antralis ✓

Dried
