

10.4 — 12.4 —

16.4 Sordaria immachle

P. lithovus Sp 8+4.5 pale yellow on moss

22.4 P. crystallinus ✓

crystallinus ✓

Sordaria sp.

Asci 16 wide. 21-22.5 x 11-11.5 good gel.

fructifera ✓

2.5 Coprinus filamentifer / verrucosus

spores  5 x 6.5

filamentifer ✓

Protophysa

asymmetrically ~~Schwe~~ - ~~fitted~~ perithecia
± superficial

found asci Ca 260 x 65, no obvious apical stroke

sp 16 x 12.5

spindle shaped 

128-spored?

spores but

culvillata
test not right?

Saccobolus 3+3+2

Sm

29-32 x 12-13

Asci 95 x 16

Sp 11-13 x 6.5

apothecia distinctly discoid, rot

conex cushion-shaped

7.5 P. crystallinus ✓

P. cornucopia ✓ (4)

depaperata ✓

S. vesicular - (4)

13.5 Cop. filamentifera ✓ P. curvella ✓ P. anychallina ✓

Sporangium 4 ER, helical 29-30 x 4.5
minima

Chaetium spiral hairs, externally rough
 Spore grey st. linear form 6 x 5
hosting chlores

14.5 Cop. filamentifera ✓ P. setae, polysepted sp 16-17.5 x
curvella ✓ 9.5-10

Capsule white, small, 150 diam.

(1) with ± cylindrical asci, 1-2 seriate spores
 ascus 9.5-10.5 x 16 sp 9.5-10 x 6
 pars var-capitate, 2 wide, st. curved at apex
Cactos?

(2) with broad clavate asci, 2-seriate spores
 ascus 50 x 20 sp. 12.5-13 x 7
 pars st. broader at top, also st. circinate
granuliformis

24.5 Capsules

Podospore polysepted asymmetrical $\frac{H}{L} < 275$
 aggregate + some single
 19-20 x 11-11.5
 pedicel 9-10 x 2-3

Asci broad, no apical smudge. 290 x 55
 128 ± spores? curvella? (H)
 ascus shape var like setae than curvella,
 but same size, but no ascus apical smudge?

16 Cop. filamentifera ✓ [discarded - warty 1.6]
