

10.4 - 12.4 -

16.4 P. lobosus crystallinus ✓

22.4 P. crystallinus Asc. immersus ✓ - plentiful

fructifer, but not making - sample

'noisy' - act. comp. cell smell?

2.5 Asc. immersus ✓ P. crystallinus ✓

~~Podopis~~ Armon 4-sp offset setae, spiky, aggregated.

sp ellipsoid 4.8-5.1 x 2.5-2.4

Asc long stalked below p.sp. 330 x 30-33

apothecia asymmetrically inserted

arizonense ✓

7.5 2 Cephus landolti

(1) small cap 4 diam spores ellipsoid 12.5-15 x 6.5 radidre ✓

(2) larger merpodal cap 15 x 5 mm

5.5 Campanulate later 15 x 15. Shape ca 4 cm x 2 mm white silky, no ring, basal ridge. A. arizonense macrocephale (H) ✓

4-spored. Large pleurocystidia. sp 12.2-16 x 6-7.5 ellipsoid

13.5 Cop macrocephale ✓ Cephus reesei - brown scleroti

- Sphaerocysts? Paper replaced & sprayed for insects.

14.5 (macrocephalus ✓)

Schizotterium imide 8-sp conium?

Scales present (sprayed for larvae)

24.5 (still larval)

1.6 Schi 8-sp 21-22.5 x ~~12.8~~ 12.5-13 oblong 1-serrate

Some small but distinct scales

only one seen - still affected by larvae ± insecticide

undetermined + not recorded

no more found.

Discarded 1.6

no macrocephalus

periods developed while

dry.
