

26.11 -

28.11 Piloborus, Pilaira + Teleborus spms on lid.

29.11 Teleborus polygona ✓ multicausal, multispined ascus
asci 90 x 35 sp. 7-8 x 4

Piloborus sp. ellipsoid, yellowish 8-9 x 5-7

Pilaira sp. 11-13 x 8 hyaline crystallinus ✓
moreaui ✓

7.12 Sporormiella 4 ER ascus 112 x 20

sp 43 x 7 australis ✓

Schizothecium 4-spored 22.5-25.5 x 11.5-12.5

Small, platyform scales, especially at ostiole leucopoma ✓

(fairly grade 130 long x 45 wide. Same sp/genera
as Ballocephala West (1970) Macrobolus)

22.12 Anopodium platyform. ampullaceum ✓

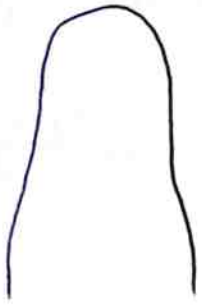

sp. 32 x 16 apically directed perical

ampullate hairs at neck < 95 x 3 -> 5-6 at tip.
brown.

Schizotetracium tetrasporum ✓

~~Podospore~~

poly spores, asci rounded at apex:-

Simple setae crowded around neck
< 90 long. 1 mature, hot spores
with appendage at each end

Arnim leprinum ✓

4.1.15 Arporium ampullaceum ✓ plurifer

Schiz tetrasporum ✓

Sp. 4 ER 48-51 x 9 heterodix

Coprus primordium

Coprus / Leptaeris ?

6.1. Coprus etc

fixed. 6.1.15
