

Brand Rabbit 20K

ENTERED

2/96

low

Dry P. placentalis rehydr. brown striate septate

Sporangium ferial branches ca 13 μ

p/u slightly larger 16-20 μ ~~rehydr?~~

chain 3-4 spores spores 6 x 3 Large ferial head

Ascobolus 1-2 mm diam Apo white, not refractive

spores peachy, enlarged 26 x 14.5

not smaller, not peachy 21-22.5 x 11-13

clear purple, lined - relatively distinct

Asci ca 300 x 32 μ

Asci not blue in K₂Cr₂O₇?

Vicentibolus fumicola ~~X~~

Apo very little vanils 26 d, but no iodine staining.

Schizothecium u-spored

17.5-19.5 x 12.5

tetraporum ~~X~~

and 12.5-12.8 x 6.5 S. nanum ~~X~~

Leptophanes cornus ~~X~~

19.5 x 13 μ

T. nanus ~~X~~

Sarcobolus

spore mass 41-45 x 16-18 ~~X~~

hyaline spores

spores ca 19 x 10 332 versicolor

Ascobolus < 1 mm ~~X~~

21-24 x 11-12

albivus

SP. 1

Capsules with hyaline 220 μ m diam

8 spaced spores basidiospores 17.5-19.5 x 9.5-11

paras separate 6 μ m. only 8: indicated above

Globose perithecia \pm immersed. Dark hairy - white

terminal and apex 700 μ m diam

Sordaria sp 8: papillate, below black with gel sheath

20.5-27 x 16

Superba ~~macrospora~~

stems (later) 29 x 19 probably

macrospora

Gymnascus mesii

Lined off 22/7
