

Blackfoot Rabbit 20/5

ENTERED 3/96

Coprinus u-spored brown setae / cysts P. cysticera not Coprinus

12.5 - 14.5 x 6.5 with excentric g.p. ellipsoid
heptemeris ✓

Saccobolus mycelia rotaceous 332

Spores 16 x 8

Pileocystis

Spore mass 42 x 16
-45

versicolor ✓

Schizothecium tetrasporum ✓

Vicmatidea funicola ✓

Rhynchospora

(?)

Polysporal, polysporad

Asci broad

clavate with distinct basal pedicel

95 - 80 x 40

Spores mycelia, ellipsoid,

T. crustaceus

8 x 4 µm

Scrobis

as the Broad Rabbit one of microidia (perplexa)

Spores 21-22.5 x 11-11.5 basal

25.5-29 x 16-19 "exploded"

sp. 1

(?)

Coprinus "cordisporad"

8 x 8 x 5

globosum nearby?

Schizothecium

27-29 x 14.5

8-spored

agglutinated hairs

canis

✓

5-10 µm appendages

Abcobolus albus

22.5 x 11-11.5

✓

Yellow clerobacter

135-200 μ m diam

leaves septate spir. rough (minutely) \cdot 3.5 μ m diam

ca 220 μ m long

in yellow mycelium but ~~appears~~ dark S.m.
wait to make

Podop decimas

probably

~~after~~ do

no appi with.

few spores

35 x 22 μ
