

Rabbit House 18.7.96 (loc 23.7)

NU 259166

ENTERED 18/96

Cheboterium

Spores smooth, thin, single 4-4.5 μ
glauous blue at maturity under
bicolour.

X Mefeldii

~~micro~~

1/8

32 Sordaria broad spored. v. rounded $\times 16$
19-21

no sheath (check?) - yes, but very indistinct + thin? humana ✓

30

Schizothecium 8 spored. 1 umbo ca 22.5 x 9.5. check

~~no sheath (check?) humana~~

23

Ascobolus Stictodorus? 27-29 x 16 μ

finely warted but clear ✓

Rhyssobolus Apotheca golden brown named cleistothecial, < 160 μ m

asci few, clavate, teleostoid 95 x 42

Spores ellipsoid 6-6.5 x 3 very polysporous

Sporomniella 51.5-57.5 x 9.5 μ even called rounded ✓

asci ~~clavate~~ cyl/clavate 175 x 29 intermedia

6.8

Podospira 35-38.5 x 16.21 decipiens like
- 8 spored - decipiens ✓

Cleistotheca 220-260 diam. black, crowded in white or red/purple mycelia decipiens black rhymoid/line 6-7 μ m

asci 8 diam. spores hyaline (naked) spores glaucous

3 μ m lot of spiral hyaline mycelia (~~isolate?~~) PN

Schizothecium 900 tall x 110 diam

8 Spred 25.5-29 x 14.5-16 μ m

Asci 250 x 23 X Conium

Globose perithecia dark red, dense translucent base
of Coniochaeta (?) X 350 diam
2 deciduous like spores

29
Cyprina Sparsely setose, even rare (possibly globose 21)
13-14.5 x 6.5-7.5 eccentric g.p. 4 spred

→ measured under at 3.1-3.7 globose hyaline
colorless smooth. — save Fusarium
Asci 7.3-7.9 spores present chromium type?

17/8 P. decipiens X

Chaetomium Spores grey ellipsoid 7.5 x 4.5
coiled hairs, grey, 4.5-thick granular. μ
short - straight at base of clavi.

27/8 P. decipiens X

Schizothecium 25.5-26 x 14.5 8. Spred / Conium

dried 27/8
