ENTERED

✓ Platobolus asci 87 x 43 nanus

✓ Schizothecium tetrasporium 21 μ x 11.5

✓ Sarcobolus hyaline volucers 41.7 x 16 ^{-4.5} Spore wall 3.5-2
Spores 16.5 x 6.5 darkly black purple, rough

lanceolate Sporangium versicolor

13.9 ✓ Rhizobolus hyaline + colorless ellipsoid 9.5 x 4.7
crystallinus

✓ Ascobolus strobiliferus? 29-32 x 16 warty, with dec grade
C. leishmanii? asymmetric gel sheath

19/9

✓ Ascobolus immodicus sheath 16 wae

✓ Sporangium 50-48.2 x 8 4ER short stalked
intermedia

25/9 white apothecia very tiny 8-spored asci. (On 1 crown
S. tenax var) Spores ellipsoid 5-5.5 x 3
hirsute Asci $\approx 42 \times 8$

✓  and shaped hairs? present 15 long hyaline sheath ✓
101 - flattened wood from Leotiales

Seems operculati, but none seen.
keys to Ascopromus cucurbitos?

✓ Ascopromus caninus
