

Rabbit Slipwith (Camp. 9) 5.9.96

32/96

ENTERO

SE 654 373

12.9 <sup>2nd</sup> Spray Podospira (if excrement?)

Spores 32 x 18

OK

✓ <200

Slightly flattened on one side

ly apped Broad cylindrical, striately  
ca 16-10 x 6

8-spored

✓ Sordaria

22.5 x 16.1 within sheath

homocera

✓ Conocochlea

Setae < 25.

8 spored

" x 8 x 4-6

lymanii

24 <120

20/9 Sordaria

19.5-22.5 x 14.5-16.

lymanii

✓ Telephora Sterzners

apo. 240 diam

+ many polysporous

✓ Sporomilia

4ER 51.5-54.5 x 11

intermedia

✓ P. zebrata

35.3 x 19.3

3 µm thick hyphae  
not infected, eggs

✓

26/9  
9

large purple imbricate 360 diam. imbricated, black lect

✓ Conochalk lignaria 11.2 x 9.5 x 6.5 setae 40

4/10 P. whorls crystalline

Hypocopa 22.5 x 12.8  
-24 (29) g set ca 16-18

brilliant blue ink ca 7x7 laminar

Hypocopa with extremely large of imbricate setae?

probably as above hint of sh. asymmetry  
ht no radial spines

brilliant blue ink

(setae very striated)

Tiny Ascidium with crenate edge old, yellowish

few setae. ht spines  
many close lines

11/2 x 6.5, with  
crenulate

~~Sordaria lunata~~

9.10 Lignaria

A. quorum

Arnica perithecia laevell spores 38.5 x 22.5

Simple tubular appendages 8. spored.  
single tiny apical g.p.? - had to see old bearing? PTU  
at each end?

P. decipies

Arim

- cardae up to 9 at base  
x 55 long

✓ Best fits merda  
in lodanot:

13/10

P. exaltata
