ENTERED

52/96

NT ~~667~~ 221667

2.10

Rhynchops (dry) 3-spined non rhizoid?

~~lesser~~  
~~reptile~~

Also very small cf fimbriate? not spined,  
few denticles (2) to snail with

10.10

P. lobos / Crystallinus

Vireonotia fimbria < 1030 tall.

Schizotheca / tetrasperma 21 - 22.5 x 12.5 - 13

24.10

8. P. decipiens 8-spined just coming

Sch. tetrasperma 19.5 x 11

Sarcobolus vesicula 45 x 16 3+3+2

Spermatella / artelia? 1 sp only 42 x 8

27.10

Sarcobolus vesicula

P. decipiens

T. rays

Sch. tetrasperma

20.10

P. decipiens

Sch. tet

1/11 J. stenospora  
C. mixta  
P. decipiens

3/11 Coprinus - orange  
foxy-red globose veil still v. imbricate.  
↓ Sore elongated lamellae all present

13/11 Spores biniform 11 x 6.5 4-spored  
apical g.p.  
12µm high, cap 3-4 mm diam

20/11 ↓ No fixed paraphyses

C. mixta  
P. decipiens

20/11 Hypocrea developing v. imbricate

20/12 Hypocrea 22.5-25.7 x 11.2-12.5  
slim ellipsoidal, var flattened elavation  
dark velvet stroma.

Heavy ~~Pleurospora~~ 340-415 diam v 550-690  
with spores 64? 19.3 x 9.6-11.2 Simple apertures,  
w/ly = Arion Leptanion but narrow-spaced  
1 apical g.p. not covered by st. exserted in section of apertures.  
better acc. 410 x 750 darker ferruginous hairs up  
to 450 long below, stpd at neck 140. 12 spores - same?

Asci clavate, round beaded

DRIED 20.12
