

NO 174005

15.4. Ascomycetes spores albidus type 22.5-24 x 12.5
1 apothecium, relatively fleshy & buff

Sporomucula 4 ER 54.5-55 x 10 intermedia

Schizothecium 22.5 x 12.5 4-spored Simple apothecium
hexasperum

23.4 Viemotidea furcata

Thelobolus Ascom 260 x 180 stercoreus abundant

Ascomycetes albidus

Pilobolus crystallinus

Pilaira 10 x 6 arenale

T. nanus

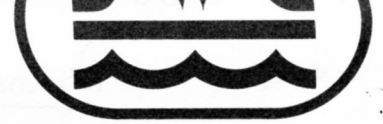

7.5 Viemotidea furcata

Ascomycetes albidus etc

Coniochaete 8-spored setae < 80
19-20 x 16 x 8 Scutigera

Setae Podopoda multispored 24-26 x 9.5

Setae < 130, aseptate on agglutinated or infuscated
to (y) apothecia. Armenia 24 up to 33 m
immature setae 257 x 57 Lepariina

Spiral hared Chalcid

Diapodion 37-38.5 x 16-14

very large spores almost spherical 13 diam, with
apically directed 14 apophyses

Stark Septate setae $\geq 6 \mu$ long, 81 swell at apex

Cones at to Dagobati (again!).
apophyses ca 16 long.

White "Helothiales" or very large Schizosphaerium

Schizosphaerium tetrasporum 22.5 x 12.8

Yellow Saccobolus ✓ Spores 19 x 9 Sum 48 x 16
washed citrins

Vidua Saccobolus ✓ Spores 3+3+2 Sum 42 x 16
Spores 19 x

5.6 Coprinus u. spred Cordspores? x 12.5-14 x 6 versicolor
vesiculose below in some spores/views slightly

V. fimbriata

Coniochaeta scatigena 19.5 x 12.5 x 9.5

Sch. tetrasporum

Podospora polyzona, with ^{agg.} shorter hairs + P. depurata-type
red
