

6.5
9.5 Pilaira moreauxi 9.5-11 x 7-8 ✓

11.5 P. moreauxi immature Ascobolus?

15.5 Thelebolus ramos ✓
Sordaria asci 160 x 24-26 sl. inflated in middle
spores 18-22.5 x 12.5-13-15

18.5 Ascobolus albidus ✓ 25.7 x 11.2 very thin gel Aspicida?

20.5 Asc albidus ✓ very 'warty'

26.5 Larvae yellow cleistothecia immature

Sch. tetrasporum ✓ 19.5 x 11

Sordaria thin gel 22.5 x 16-13

prol gel Sordaria humana ✓ if finicola?

29.5 Sprayed for maggots

Gyn Cleistothecia brown (golden) dichotomous mesh - rough surface
(different from yellow, still immature?)

ca 8 diam spores hyaline, (?)
verrucose ca 2.5-3 diam. ± spherical.

2.6 Gymno red-brown rough wet Spores ca 3 diam

Saccobolus 3+3+2 42 x 16 Sm. lentic ap
Spores 19 x 7 ± smooth - v. st. verrucate
vesicular

Schizothecium 19.5 x 9.5 S.sp. } fair scales
vesicular

Sordaria thin gill broad ellipsoid 24 x 16
22.5 -
humana

5.6 Cephus lanetuli 9.5 x 6 pseudocedrus ?

Sacc. vesicular ✓ Sch. vesicular ✓

Ascobolus green long lived / Spores 11 x 6.5
crenulate

12.6 Asc. alberts ✓ Sch. vesicular ✓

Cep. stercorarius ✓

Gymno

19.6 Cep. verm / filamentifera ? dark spores
veil with clamps

Gymno investmat verrucate, dark red/brown ✓

Sch. vesicular ✓

23.6 4 sp. good faced cystidia. spores dark, ellipsoid
9.5 x 5 Cep. vermifera ✓

Sch. vestigia 'Stilbon' with rough denudate
lenticular conidia 6-7 x 3-4.5

27.6
