

Good Filoba Naxos 8 May 99 BAR
25°29'35"E 37°3'27" N

10/99

Inhabited 20.5
24.5 -

26.5 P. lobows 8 x 5 pale crystalline ✓

29.5 P. lobows 8-9 x 5 crystalline ✓

Sordaria 22.5 21 x 12.5-13 clear gel
"strongly 1/2-sided" Ascii 190 x 15 fungus

2.6 Ascobolus immersus ✓ 58 x 35 8-sp

Sordaria 19.5 x 12.5 good broad gel fungus ✓

P. crystalline ✓

5.6 Xylaria? Ascobolus immersus

Coprinus fil/vern imake

Sordaria large immersed perithecia
Sp 22.5 x 11.5 -128 sharp seed
-24 this gel - smelly

12.6 Cop. stercoraria ✓ fungus

Sord. fungicola ✓

Chaetomium spiral grey Spores 16 x 9.5 grey
liriform

14.6 Spores very dark
st. striated  5 x 5 x 3
Filamentifer ✓

19.6 Chaetamin 16 x 9 linear form. spiral

Sch. vestigata ✓

Pleiospora 16-spored Decipiens type 32 x 21

14 spp. 40 ✓ pleiospora

23.6 P. pleiospora ✓ Sch. vestigata ✓ S. finnicola ✓

P. decipiens ✓ 8-spored

27.6 Cap. stercorans ✓ S. finnicola ✓

Sch. ~~lehanpora~~ 18 x 10

vestigata ✓ with 2, 4 spores + 6 or 4 aborted
poor scales

Coprotus Sexdecem spores ✓ Sp 11.5 x 7

Asci 110 x 26

Chaetamin spiral 13-14 x 8

Pod pleiospora ✓ 35-38 x 21

5.7 Xylophora ✓ Pod pleiospora ✓ Pod decipiens ✓

Sch. vestigata 8 sp - spores seen smaller + broader

than usual 16 x 9.5 ?

9.7 Cephus 9.5 x 5.5 dark ✓ elliptical spores fine
narrow veil vermiculifer ✓

black spherical *Heera* Ca 450-550 diam

asci spherical 8-clarate ca 20-25

Spores (mathe?) hyaline globose 6-7 dia

Smooth

Aerial wall dense, black, no ornamentation/veins. Unable to see cell structure

Seb. vesticha ✓ rounded as before

Pod deepias ✓

Seb. tetrasporus ✓ ok

- no 'branches'

14.7 Chaetomium

Spiral veins

Spores

grey, large linear form

14-16 x 5

gp at each end

Seb. vesticha ✓

rounded

Spores

16-17 x

9.5-10

18.7

Black *Heera* ?

Sp. 4 tapered, parallel 3. bits 51-55 x 11.5-12.5

✓ Gradesporus

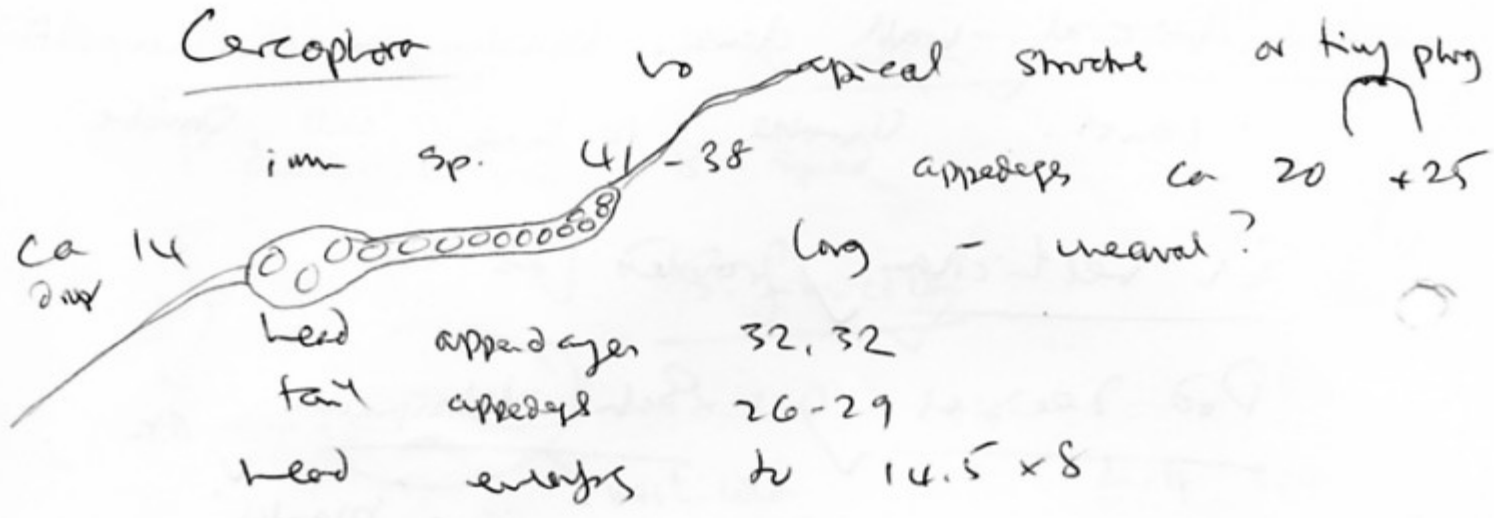

27.7

P. decipiens

Rounded

Sch. vesticosa

Cercophora

Lower wall of peritreme of dark grey
small angular cells. and weak denser,
irregular surface to weak. No hairs etc.

keys to Cercophora but species too small x
Substrate wrong ss. Lurdant.

cf Silvatica

1.8

Cercophora

Sch. vesticosa

(on centre pellet next to gap)

10.8

P. decipiens

Spiral chambers

Sch. vesticosa

Dried 10.8
