

rabbit Porongorup Range 34°40'57"S; 117°52'6"E 1.10.99 44/99
NP, WA inc. 1.11

2.11 Coniochaete 10 x 7 x 4 Lignaria ✓ no setae

7.11 Myxo - black head on stalk ca 100 hook
lead < network of branches with brown s.m.
spores spherical 11-12 diam
-12.5

Coniochaete - short setae < 25

spores 10 x 9.5 x 3.5 asci 125 x 11

Sporomella only fragmented spores if indented ✓

11.11 Sporomella asci ca 290 x 40

spores 8 celled terminal cells tapered.

pseudobezel immersed, ca 400 diam

if spladers, but spores too wide ✓

Coniochaete discoid 11-13 x 9.5-10 x 7 Lignaria ✓

spores ca 145 x 16 parallel g. slit

no particularly unusual 2, 3rd etc cell.

17.11 Con. lignaria ✓

Sporomella pseudo ca 350-400 diam

8 celled, apical cells tapered. deeply constricted at
septa when mature g. slit ± parallel.

164 x 16

if spladers ✓

SLIDE

Coniochaeta discord, S-sp 19.5 x 16 x 9.5

Setae scarce < 55 ✓ Scatigena

29.11

Sporormiella UT fragmented - individual cells 12-14

Grandispora?

not seen again

Coniochaeta ligniaria ✓

Con. Scatigena ✓

nothing very fresh present.

8.12

Con. ligniaria ✓

16.12

Sporormiella UER 88-90 x 16

ascus 300 x 40-45

-93

cylindrospora ✓

Sordaria

25.5 x 15-17

-27

superba ✓

22.12

Coniochaeta ligniaria ✓

Spores like P. exaltica ?

not seen again

Sp. UER

ascus 225 x 45

80-88 x 16

cylindrospora ✓

31.12

Sp. UER ✓

ascus 270 x 42

83-87 x 14-15

6.1

Con. Scatigena ✓

OLD

Trichodelitschia

bisporula ✓

25-26 x 8

Nothing fresh

Doied 6.1

- Coniochaeta ligniaria
- Coniochaeta scatigena
- Sordaria superba
- Sporormiella cf splendens [s]
- Sporormiella cylindrospora
- Sporormiella intermedia
- Trichodelitschia bisporula
