

Goose E of Lady Elizabeth, Whalebone Cove, Stanley FI 7/00  
 The 611 VC 4573 23/4/00 incubated 21.5.00

21.5 Pilaira / P. Whitows 51.75 57.817W

23.5 No new growth yet - none like Pilaira  
 spores ellipsoid hyaline pale yellow ellipsoid  
 9-16 x 6-9

28.5 Pilaira spores distinctly yellowish 9.5-13 x 8-9  
 some larger isoneural ones

31.5 6.6.

Saccobolus

4-spored

38-42 x

16-19

45x13

Spores regular  
 banded

16-17-18 x 9-10

check spores? ✓

4 in a row in young asc:

Ascobolus

fusely verrucate

sp. 29-  
 27-24 x 14-15

Stictodermis ✓

10.6

A. stictodermis

26 x 15.5

fairly abundant

on dung & on paper

Seccobolus

Spores

4 x 1

1+2+1 or 2+1+1

Spores 19 x (6) not so

45 x 12

42 x 16

regularly banded as 66.

48 x 13

39 x 16

occasionally 5-spored

48 x 13

45 x 13

42 x 17

Spores & spore masses smaller than

S. quadratus ~~is~~ but larger than S. cheoparcus. OK of van B

28.6

Sch. verrucata? ✓ 6-sp. 16-18 x 10

uniserial → biserial

Scales moderately developed - clear, but small

Ascomms stichodermis ✓

Schizotheca 4-sp. poor seeds

Spores 22-23 x 10 ellipsoid - not as

apically pointed as usual. tetrasporium?

7.7

Sch. tetrasporium ✓ as above

Saccobolus ✓ 4-sp. 19 x 11

2 x 2 42 x 19

4 x 1 42-55 x 16

Dried 7.7
