31.5

Saccobolus numerous old 3+3+2

Sporomniella 4 ER 24-57 x 11 intermedia ✓

Schizotremium 4-spored 22 x 11 tetrasporum ✓

Sporomniella 4 ER 40 x 8 australis ✓

6.6 Sch. tetrasporum ✓ good scales

Sacc. versicolor ✓ sm 41-44 x 16

spores smooth - lightly feath.

Rypanthous Polysporus ✓ Sp. australis ✓

Pilobolus 7-8 x 4-5 pale-ellipsoid crystallinus

10.6 R. polysporus ✓ Sacc. versicolor ✓

Sch. tetrasporum -

Sp. 4 ER 24-58 x 11 intermedia ✓

26.6 Capnia miser ✓ Sch. tetrasporum ✓

Sch. vesiculata ✓ 8-sp. poor scales sp 87, rounded-broad
21-22 x 14

Podospira pleurospira ✓ 16-sp

Saccobolus 3+3+2 sm 38-42 x 16 spores smooth
versicolor ✓

Capnia white spores biserial 12.5-13 x 8

ascos 100 x 24

Sp. 4

Paes with greenish brown network amongst tips

T. clodochs chya

Spores 21-22.5 x 8-9
hospita

Dactyloella
if Cionopage
Dactyloides

30.6 Coprinus miser ✓ Pod Pleropora ✓

Protopora Spores 16 x 10
Setae not inflated or agglutinated
asci clavate 240 x 65
24 spores not seen, even in II

curvella
~~Sclero~~

Delitschia S. sp. biseriate Spores slightly pointed
at apices, not or hardly casketed non-oblonge Spher
57-64 x 22-25 Asci 680 x 65

Large perithecia, long black neck winter furcacea?

Sp. 4T gslit parallel to st. oblongo
deeply casketed x 11-11.5 Protopora

? Small groups of 8 spores of Schizo, on/in
white glomer structures Spores 6.5-7 x 3.5-4
with hooked hairs - cf Hanatacautoscypba?

Sp 4ER Spores 43 - 51.5 x 9.5 antike/intermedia?
Hypocrea single per on ae pellet

8.7 Cep. stercoraria ✓ Pod pleurospora ✓ 16 sp.

Hematacanthoscypha ✓ hooked ventral setae.

baserate ellipsoid uniaxial spore 6x3, associated with Schizothecium

T. basipila ✓ — cf. monilii or 21 smaller but some with

Hypocypa side whitish perithecia no stroma

long spores uniseriate 9.5-10 x 6-6.5
g. slit about full length Parvula ✓

long of asus pore  faintly blue inks

13.7 Cep. miser ✓ Cep. stercoraria ✓ Pod pleurospora ✓

Sch. Lehmannii ✓

Dried 13.7 for Hematacanthoscypha
& Pod pleurospora
