

ered Goose New Grass Yard, Port Louis FI TWE 677 28/00
20.C.00 VC 2190

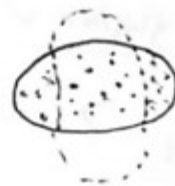

incubated 1.8.00

2.8 Plains? old. sp. pale orange ellipsoid 14-16 x 6-8

4.8 9.8 Ascobars 'deglups' 27-29-32 x 14-14.5

not all spores with extra development of
plain material

cleistothecial at first, partially
immersed

Immature aptera intensely violet in color, white
furry along edges while still v. young
Saccobars?

Ryp polygona 3-4 asci

14.8 Sacc trispore ✓ aptera still small, 8
still with white "fringe"

45 x 16

Sp. 16-19 x 12.5-13

Asc. deglups ✓

R. polygona ✓

large 'plain' aptera.

asci 85 x 25

42 x 17

Schizothecium immature

Ascobolus immersus

Sch. vesticula ✓

8-sp uniserial poor scales
18-19.5 x 9.5-10

Ascobolus ✓ 'not deglupting'
or only faintly so on
some spores

27-30 x 13-16

27.8 Asc degluptus ✓

~~Sphaeria~~ ✓

golden tetrizon sp. asymetric

lunariform

28-32 x 11.5-12.5

Smooth olive-brown,
maturing to v. dark brown - black.

neck with v. short (<50) verticillate cone

~~29 t. canons~~

Melanospore brevirostris ✓

Dried 27.8.
