

Horse (old) Near Shearing sled, Pat Louise FJ 29/00

THE GTS 20.5.00 VQ 2290 (?)

incubated 1-5.00

2.8 Asciobolus bisetate spore ellipsoid 22-24 x 12.5-13.5

asci 160-170 x 35-36 Setae 160-225 x 12-13 at base

unicell ✓

4.8

9.8 Asciobolus immersus ✓

70-77 x 35-32

Imm Schizotetrax

14.8 Small shiny black tetrax 100-150 diam  
no differentiated contents No setae or hairs  
wall of grey black polygonal cells < 8-10

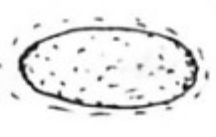

Asciobolus carrens ✓ sp. 19-20 x 11-11.5

Sch. 8-sp poor scales bisetate. vesticula ✓  
22-24 x 12.5

21.8

Asciobolus small albatross-type apothecium

sp<sup>21-</sup> 22-23 x 10

hammings ✓? check

Sch. 26 x 12.5-13 -27.5  
1-2 Setae

conium ✓ good scales

27.8

Cap. stercorarius ✓

Pod. decipiens ✓

Sch. vesticula ✓

Asc. hamaxesis ✓

21-22.5 x 10-10.5

clear purple,

browning with age. st. wall verrucose at poles

ascus wall blue in KI, purple contents, 17.5 x 26

2.9 Sch. conicum ✓ Sch. restricta ✓

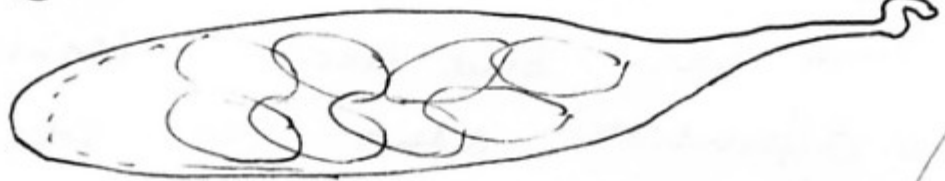

l. canars ✓ Pod. decipies ✓

Small black spores - spores - not ascid?

11.9 Pod. decipies ✓ Sch. conicum ✓

Asc. hawaiiensis? 25.5-24-21 x 9.5-10.5 finely verrucose,  
slightly more so at poles brownish purple.

← 10 x 30 → ← 55 →

exipium parhyalms 15-20 diam.

clearer purple in an early ascus.

18.9 Sch. conicum ✓ l. canars ✓

Coprinus cordisporus ✓ spores etc.  8 x 9 x 5

black spores of 2.9 low with hyaline germine  
spores 3 um diam, no signs of ascis

25.9 Nothing new. Casual.

discarded
