

Pine Deer Malbe forest 21.10.00 N x 94 ~~42~~ 7091 52100
22 fresh pellets = 9.5g dried = 2g

23.10 Coprinus stercomarius still young, pinheads

T. macrosporus spores globose 8 x 8
to broad ellipsoid 7.5 x 9

Setae thick walled, septate up to 450 long
x 16-18 at base

Sphaerosporus

P. lobosus spores hyaline, ellipsoid, small 6 x 3

25.10 Thelebotrys steffensenii 210 x 240 immature sp.
to setae. spores 6 x 3

Uromyces

T. Sphaerosporus ✓ spores 9-9.5 diam
setae to 320 → 400 8 x 9.5

Cop. lentiginos? immature - orange brown, setae
+ Sphaero cysts not seen again

Lasiosphaeria Asci 160 x 45 spores broad
ellipsoid, broad, biseriate 22-28 x 12.5-13

Coniophora

Thelebotrys macrosporus Pores distinctly capitate to
6 um, green contents. < 2 below. Asci 45 x 11
spores biseriate, ellipsoid 8 x 4

1.11

Thel ster corea ✓

Tromobas sphaeropora ✓

Cap. stercorea ✓

Pil. umbonata ✓

3.11

Tricho. sphaeropora ✓

± completely immersed -

only radiat setae visible at surface
up to 550 long

Thel. microspora ✓

P. umbonata ✓

Schizothecium 4-spored

21 x 12 x 13

tetrasporium ✓

12.11

abundant Cap. ster corea ✓

Fruic emerged, moist.

nothing else obvious

19.11

Cap. stercorea ✓

1mm

Ascobars

26.11

Cap. stercorea ✓

Other Cap. spores 4-spored

no setae - etc for
Cordispora

9.5 x 7 x 4

triangular pentagonal

Innate
faint

I. canens ?

Sch. tetrasporium ✓

K1 +

Ascobars

- albidus type apothecia

22-24 x

4 spores 11.2 - 12.6

albidus ✓

30.11 Cop. stercoraria ✓ Cop. cardisporus ✓
leodermis coners ✓ sp. 21 x 12-12.5

Saccobolus tiny apothecia < 250 diam
spores 2+3+2 grey-purple ± smooth
spore wall 35-38 x 11-12 Asci 75-80
spores 12.5-14 x 6 ellipsoid. x 22-23
Pores hyaline minute, lumpy smaller above
depauperatus ✓

Pilobolus umbonatus ✓

6.12 I. caneris ✓ Cop. stercoraria ✓ Cop. cardisporus ✓

Schizothecium immature. Good crown of scales
S. sp. Conium ? imm spore 25-26 x 15

Asc. albidus ✓ Sacc. depauperatus ✓

12.12 I. caneris ✓ Cop. cardisporus ✓ Cop. stercoraria ✓

Sch. S. spred, good scales 26-28 x 14-15 ✓

14.12 Cop. cardisporus ✓ I. caneris ✓ Conium ✓

20.12 I. caneris ✓ Cop. stercoraria ✓ Cop. cardisporus ✓

Cop. Schlossi immature. No fecal cystidia
Scales acute < 50 long x 8-9 diam at base.
No sphaerocysts

24.12 Cap. cordis puros Cap. sternans

I. canaris ✓ Tricolobus sp. canaris ✓

Cap. Schlori definitely no focal cysts
original f.b. not developed later. Another are coming.

Sch. canis canis ✓

1.1 Cap. sternans Cap. cordis puros I. canaris

Cap. Schlori still developing.

4.1 not making - sterile?

7.1 spores ellipsoid 6 x 3 g.p. v. st. excentric?
4. spore. Pellucidus

11.1 Abundant Cap. cordis puros, Cap. sternans

Cap. pellucidus ✓ Sch. fennipmum ✓
