16

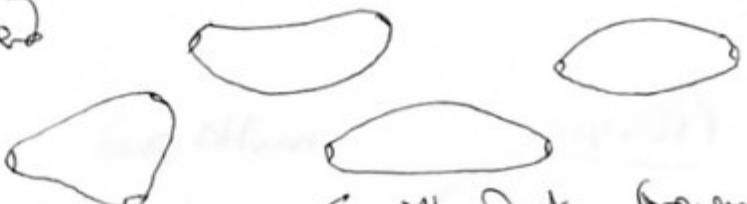

21.4 Sch. 8-spined, good scales 25-26 x 12.5-13
Conicum

Immature Camachoella? multispinous - no scales?

29.4 Sch. conicum ✓ A. stictoides ✓

Sch. vesiculata ✓ 8-sp. 22-23 x 12.5-13 Scales
poorly developed

Schizothorax gibbose pentteca no scales
64 spines? 16 x 10 asus no apical
snout, forked.

3.5 Pelagorhynchus? golden pentteca; asymetric frs ad spine
g.p. at each end
22-26 x 11-13

Smooth dark brown.

P. Sebosa ✓ Spines 18-19.5 x 11 Sch. conicum ✓

A. stictoides ✓

Dried - going mouldy
3.5

See note on 26/00. This Ascebellus ok as
A. mitchellii given colour + other features. That
on 26/00 looks more like A. brantophilus -
see subsequent collections 48+50/02, 56/05
Characterised by white → brownish aperture.
