

14.5 Ryprobius polysporus ✓ apiteca. derelictat

Ca 100 diam Spores 8x4, hyaline

ellipsoid 5-10 asc / apothecium

Asci cylindrical-ellipsoid ca 60-65 x 17-20

64-128? spores.

18.5 R. polysporus ✓

22.5 -

26.5 dark spherical Pycnidia < 275 diam

Spores cylindrical-ellipsoid, 5-6 x 2.5, gl. smoky
on nasse.

31.6. black ostiole thecium. Spores oblong-
ellipsoid Smokey-olive ca 5 x 3

Pycnidia

10.6 Pycnidia ✓

Protopia large peltate ca 900 high.

generally hairy, brown ferevose. w marked scales
of lake of neck.

S. Spores, ht same size, shape & number
natures in ascus very irregular. No ascus
apical stroke. Same spores (black-nx) 38 x 29,

Others 32 x 21

Conium - type apothecium.

cf Conium?

14.6 large pyriform perithecia ✓ 550 diam x 1100 tall.
Sparsely dispersed hairy below. neck 87. papillate rugose.
No setae, no large prominent scales of inflated cells
8. spored uniseriate, irregular same size & shape

Pyrenopeziza ✓ Spherical with nipple-like setae -
as in ~~After~~ samples

20.6 Schizothecium Small distinct scales
8. spored uniseriate 29-31-32 x 16

25.6 Schizothecium as above, irregular as before

Dried 25.6
