

21.9 -

25.9 (make Asechilus immersus)

stellate, white spiky stroke arms
500 μ m by x 30 at base, expanded to 150
at fracture with ~~striae~~. Cells were inflated
below — Hypocenter? +

28.9

A. immersus f.sp

* distinctly acic, with fimbriate ed of neck.

Rixidopora sps 39-35 x 6, no sign of
Septa: neck ca. 300-350, oval
height 4-10 Microspores ✓

3-10

Rixidopora abundant perithecial bodies ca. 60-70
diam. necks 200 x 25. Spores 35-48 long

[Smaller strokes than those seen before]

Vismetida fimbria ✓ necks 150-950 μ m long
Microspores ✓

A. immersus ✓

7.10

V. fimbria ✓ A. immersus ✓ Rixidopora ✓

19.10

V. fimicola ✓

Small white ~~apothecia~~. Ascomata, Small, broad

ellipsoidal verrucate spores 16 x 10-11

h. serrate. asci 25-28 diam. -17.5

apothecia < 350 diam

all-round gel.

aglaosporus ✓

Podospora

decipies - type spores

8-spored asci

35-38.5 x 24

decipies ✓

Saccobolus 3+3, 25m 31-32 x 13

spores minutely rough 12-13 x 6.

depauperatus ✓

Perithecia

4-spored asci, ^{obl-} uniseriate. Spores

diam. 10.5-11.5 x 7-8

no appendages, apical g.p.

Asci ca 70 x 12 tapering to narrow base/stalk.

p.s. 40-50

long apical pore KI-ve Fimbricella ?

not as long-stalked as shown for macro ^{mischka} ~~macro~~

in Krog 1995, as only 1 g.p. seen?

2310

Coprus vermiculifer ? — check spore

V. fimicola ✓

Lodopromus immitis

Fimbricella ✓

Asci with larger stalks than 19.10

overall length

100-110

spores 10-11 x 6.5-8

Schizotheca S. sp. (Some with only 4
sp. (many) 19.5-22.5 x 13.5 uniseriate
scales small but distinct

Ascobius ~~various~~ sp. ¹⁶⁻ 16.5-17.5 x ^{10.2-} 10.5
small white apothecium gel? - all round

vesticula ✓

glau spores ✓

29.10 Sch. vesticula ✓

① I. canens 17 x 12 poorly ornamented spores
pale waxy ~~dark~~ irregularly shaped apothecia

4.11 Gymno fil/ren parvula - check spores
thin-walled dichotomous hyphae - not matured
not recorded. ⊕

Sch. vesticula - P. decipiens ✓ lag (y app
- < 32 lag.

Sp. 4 ER 51.5 x 12 intermedia ✓

① 12.11 Vismetilia fumida ✓ Sch. vesticula ✓

20.11 V. fumida ✓ Sp. intermedia ✓ Sch. vesticula ✓

~~Sp. 4 ER~~ 20.11
discussed

* Spores on paper  6-6.5 x 4
✓ dark small but if filamentifer
