

12.11
14.11 Pilarea sp. pale ellipsoid 8-12.5 x 5-8
moreaui ✓

16.11 P. lobata crystallina ✓
P. moreaui ✓

21.11 Viemolida fimida ✓

Saccodora versicolor ✓ sl. rough - fealy exosque

Rhynchopora dry - spred, brown shate
Sporopores 4-5 spred chains, feral head
cell spores 4-5 x 2.5-3 fresana ✓

Rhynchopora wet - spred also seen
spores 5-7 x 3-3.5 large feral head cells
brown shate sporopores repae ✓

23.11 Immature Sphaerodes? ✓

30.11 Podocidaria flounei Caprim stercorarius ✓

Sphaerodes sp. greenish, g.p. at each ad
17.5-19.5 x 9.5-10.5 fimida ✓

10.12 Cap. stercorarius ✓ ≡ M. beviridus

Kockxellal pale yellow (3) 4 (7) rays
sneaky for spec of sporopores

Merospores feral 8-9 x 3. Perospore septate, 16 diam.
crystalline rough

4 asc ca 150 long. Meropoma pending
outwards/downwards erecta? ✓

Pod. deepies ✓ - check Spore no.

15.12 Cap. stercoraria ✓

Gymnascus nesi ✓

Sphaerodes fumida ✓

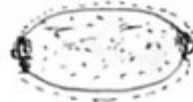

Yellow clathrate, hook-
armed vestiture

Ascobolus small apothecium, pale. Spores sl. purple.

minutely verrucose with cacchetea at
deep base +ve ink!

apices

thin set all round?

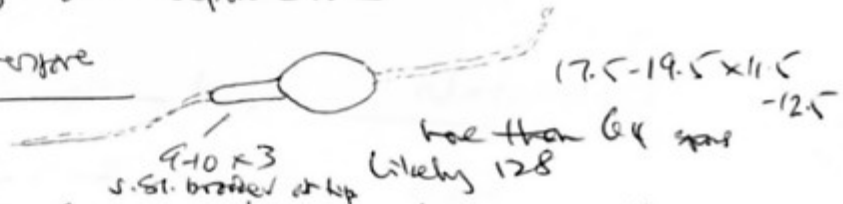

22.5-24 x 10

Asci thick
walled at apex? - might be Decollaris - asci thick
- only one apothecium

Setosa polyspora

Podospore

Asci 320 x 60

Isothecium? 21-24 x 9.5-11 spores with variable in shape
+ not very verrucose Paras typical
KI + bwe.

Caneris ✓

Setae non-aggregated, w/ inflated hyphae

Setosa ✓

20.12 Pod Setosa ✓

Caenaria erecta ✓

Dried with Caenaria & Gymnascus
20.12 + P. Setosa
