

2.12. Ascogonium woolgrass x
 head marginal hairs
 sp. 11-13 x 4.5
 -14
 ca 30 x 6
R. polytrichum x

6.12 Pilastera noreauii x poly ellipsoid 9-13 x 6-8
Chaetocarpus spores smooth (?) 3-3.5 diam
 -4.5.

10.12 Chaetocarpus fimbria x Sch. tetrasporium x
brethelii x
Rhizocarpon dry, brown, rhizoids? dark-de-gout
 back tpr large flask head cell 3-4 - spores
 neurospora Sesuviana x

P. lobosus spores small hyaline ellipsoid-oblong
 7-9 x 4-5 crystallinus x

A. woolgrass ✓

15.12 Sch. tetrasporium ✓ Cap. stercorarius? analysis

20.12 V. fimbria ✓ Sch. tetrasporium ✓
Ascogonium brassicae x ki faint nople
 white, marginal apothecia
 spores verrucate 11.8-12.5 diam, family nople/lae
 when make Asci 190-220 x 22.5. Pores hyaline -
 glassy - coolant 3 diam st. imedial unipyl/wavy tips.

2.1-02

Cop. stercorarius

Sch. tetraporum ✓

Schizothecium 8-sp

broad rounded spores

with v. long thin

ly appendage

Single 2ys?

- not clear in

25-27

x 18-19.5

discharged spore

16 x 2

± uniseriate

Scales small but clear, tending to ridge vertically
no ~~clear~~ clear apical axis stroke.

cf Sarcomyces

Asc. brassicae -
