

2.1.02 -  
6.1 -

10.1 Sordaria spores with clear gel. 16-18 x 10.5-11.5

Linnicola ✓

14.1 S. fuscicola -

20.1 S. fuscicola ✓ good gel 20-22 x 11-11.5

25.1 Sporosmiella immature S. fuscicola ✓

Lesrobiales tangentially elongated ~~ex~~ circular

cells. Sparse short setae, biseriate

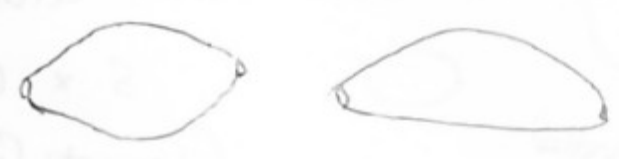

Asci 175-195 x 30-32 Spores ellipsoid  
-200

19-19.5 x 11-11.5  
-22.5 -13

innocui ✓

30.1 Sphaerobolus / Delavospora Spores distinctly

asymmetrical in some views

dark gray, smooth  
19-22.5 x 11-12

golden spherical fecium 275 diam.

setae at neck acute to blunt, some up to 190,  
not shorter ca 100-120 long.

hirsutus ?

Lesrobiales Setae sparse, < 120-130, < 190  
Asci 165 x 35 Septate, inflated at base

Sp. 4 ER Asci 130-140 x 22-24

Spores 42 x 9  
-45 diagonal g. slit.

13.3.02

C. minima reters - stercoers type veil - ca

5 mm before expoding

antralis ✓

also filamentifer (vermiculifer) - type pruridum

Sp. 4 ER minima ✓ 30-31 x 4-4.5

Gymnascus yellow gymotecia - velvety back-red/

orange. Ascii globose 8-9 diam. Spores

hyaline, colorless, smooth ca 3 reesii ✓

Sordaria fimbria ✓

Sp. antralis ✓ 45-48 x 9.

18.3 C. fil/vern marked to be white leaf cap 15 mm diam

Spores dark □ flattened, at tapered from just above base

retel

in one row, ellipsoid in

8 x 6 x 5

veil hyphae thin walled

filamentifer ✓

24.3

S. fimbria ✓

Sp. minima ✓

Cap. filamentifer

Cap. sphaerocyt pruridum ✓

14.4

Cap. filamentifer ✓

Spores 6.5 x 4 ellipsoid

stercoers

Capitulum Sordaria spores ✓  
ellipsoid hyaline

Spores 11-12 x 6

(6-spored)

21.4

S. fimbria ✓

Cap. filamentifer ✓

29.4

Cap. stercorarius ✓

Chaetomium spiral grey hairs. Clavate asci  
spores pale grey. sp. claviform, ca 6 x 5  
bosky chodes ✓

Sadana fimbria ✓

Dried 29.4
