

13.3 -  
 18.3

Cap Schlossi + Stetson developing  
 + Selima

Podospira S. sp. uniseriate ✓ basinate when mature.  
 Sp 39-45 x 21-19

Simple Single Zy apodges ? - apical splitting  
 + expanding in the?  
 long 4 apodges 4-5 x 2.5 basal not seen.

Asci ca 320 x 50  
 no obvious apical structure  
 St. rugosity at  
 vent, but no scales  
 few flexuous hairs below

Selima spores 51-61 x 26-21

Alchra ✓

24.3 Cap. Schlossi 4-spored spores small ellipsoid  
 7-8 x 4 No facial cystidia.

Beltrados ✓

Podospira as 18-3 small indented scales + flexuous  
 hairs Spores basinate in mature asci

Section of apical app. :- (52) ?

14.4 Cap. Schlossi Spores 6-7 x 3-3.5 ellipsoid [not  
 Setae acute carbon from this first body]

Selima Alchra ✓ ~~Sp~~

Podospira as before [ad - same as on 94/01]

Spms 38.5 - 43 x 21.5 - 22.5

inflated cells at neck - not developed into large scales. flavous hairs below

Corvuloides ✓

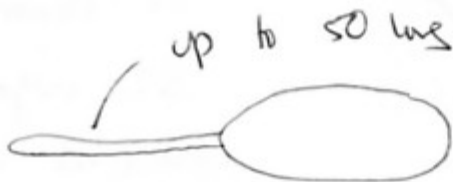

Codophanes carnos

white to pale pinkish spines

Spms 19.5 - 22.5 x 11 - 11.5

Podospira fimbria

perpendicular hairs,

Spms ca 24 - 58 x 29

21.4 P. annuloides ✓

24.4 P. annuloides

3.5 P. annuloides

Dried 3.5 with P. annuloides
