

9.4 Sporomella 45 x 9 - 9.5

diagonal germ slits antralis ✓

12.4 P. laura pale ellipsoid 8-9.5 x 5-6 ✓

17.4 Schizothecium 8.sp. poor scales antralis

Sp 25.5-29 x 14.5-16

conicum ✓

Sch. 8.sp. poor scales sp. uniserial
17.5-16 x 11

vesticaria ✓

20.4 Ascomys immature - white

Sch. letras pover ✓ 19-21 x 4-sp
12.5-13

poor scales

Sch. vesticaria ✓

P. lobos aly are - pale ellipsoid spores 7-8 x 5

2.5 Evenly Spiky aggregated Schizothecium
multiserial, letras pover / saccate Schizothecium
in sp. letras pover - No letras pover sp.

← almost dumbbell shaped

T. lobos immature

Sch. conicum ✓ Sch. letras pover

Ascomys letras pover pale (± white) apothecium

ca 0.5-1 mm diam.

Spores

17.5-19.5 x 9.5

Saccharifera ✓

7/5 T. n. lobatus still imake? ca 350 diam
setae thick walled, ca 330 long, st. inflated
& irregular at base. except for cells
irregular polygonal (interlocking). < 20
imake spars ellipsoid ca $11 \times 8-9$
Zukalin

Aec. saundersii flos ✓ Tiny Cephalos Sex decompans

apothecium pure white ca 120 diam x 100 tall
cer 10 asci. 90×25 16 spores, spars
ellipsoid imake, $11-11.5 \times 6.5$

Prospora Rhizophora at least 16 spores, might be
sp. $25.5-29 \times 16$ 32
plerospore

Sh. vesticosa ✓

Sporomniella 4T ~~labeled as~~ spars. spars
 $30.5-35 \times 6$ parallel g. slits

After one ad cell (upper?) was painted & larger than
the other. Same haling. deeply colored

Leparia

13.5 Tiny white Cephalos Sex decompans ✓ 120 diam x 130 tall

13.5 White Throats ca 400 diam, x 500 high

prolonged asc 38 diam

Spores bipolar papillate, minutely verrucose,

29-32 x 14-15 have seen free

paras hyaline irregularly capitate. Still very young

K1 blue.

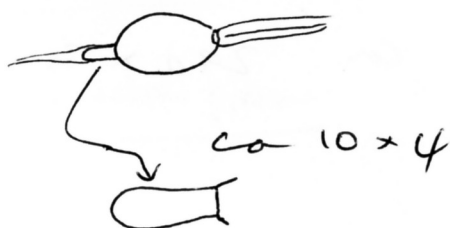

Volms koldjii ✓

Pedersen Saccate ~~very spore~~ asc' symmetrically

radial, mostly non-aggregated like up to 210 long

sp. 19-20 x 12.5-13

lunate spores ± 'radon'

Sehosa / bifida?

Can't confirm hist of
SPH 24 apical app. in IT

Sp. 4T 32 x 6 leporina ✓

Schizotheca good seals S.sp. bisectate 26 x 13

Conicum ✓

12.5 P. Sehosa ✓ as 13.5 Sch. conicum ✓

Cap. See decem spores ✓

Cap. S.sp but ± identical

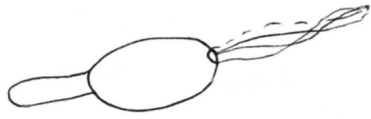

Sp. leporina ✓

apothecia v. small, white - 10-11.5 x 7-6
asc 110 x 20 cf drawings ✓

Sp. 4ER 52-55 x 10 internodina ✓

Sch. leporina ✓

23.5 Podoprym multispored Saccato asci. Setae symmetrically
arranged. Sp. 19.5-21 x 11-11.5 clear
-22 1/4 appendage
Asci ca 550 x 125 13-14 x 3-4

Setae ✓

Sch. concavum ✓

Cap. sexdecem spores ✓

Sch. restricta ✓

Sp. leporina ✓

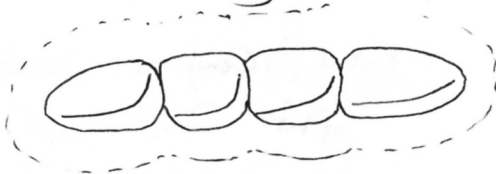

Sp. 4 ERAT 64-84 x 15-16

rhizome g. slts, deeply embedded @ septa.

basal cell larger than apical

megalospora

Asci tapering below. ca 290 x 38

25.5 Sp. leporina ✓

P. Setae ✓

Sch. restricta ✓

Sch. concavum ✓

White Canope at 19.5 ✓

8-sp. Asci ca 80 x 16

Spores 9-10 x 6-6.5
