

8.9 Sordaria 26-29 x 16 good gel
Asci 260 x 23 Superba ✓

11.9 Pilinar noveboracensis ✓ sp hyaline 11-11.5 x 8

Sordaria Superba ✓ 29-30 x 17

16.9 Sphaerocarpus finicola ✓
Uromyces

Saccobolus 3+3+2 small hyaline apothecia 200 diam
Sm 38.5 x 16. Sp 16-17 x 8-9
lightly faky

Schizothecium leaves pinn ✓ 4.sp. 19.5 x 12
versicolor ✓

P. lobata spores ellipsoid 7-8 x 5
pale yellow. crystallinus ✓

30.9 Coprinus stercoreus ✓ Ascobolus albidus ✓
22.5 x 11.2. 

Sch. leaves pinn ✓

Podospira leaves ✓ 8.sp

14.10 Coprinus musc ✓

35-36 x 19

Cp. cadsporus ✓

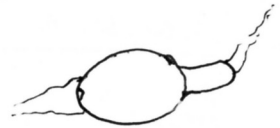

Cp. stercoreus ✓

P. decipiens ✓

Podospira canes ✓

sp 19-20 x 10.5

Setae Podopara — not aggregated or inflated,
up to 120 long, evenly placed around neck.
physped? asci & sea. Spore

19.5-21 x 12.2-12.8

14 appendage blunt ca 6x4

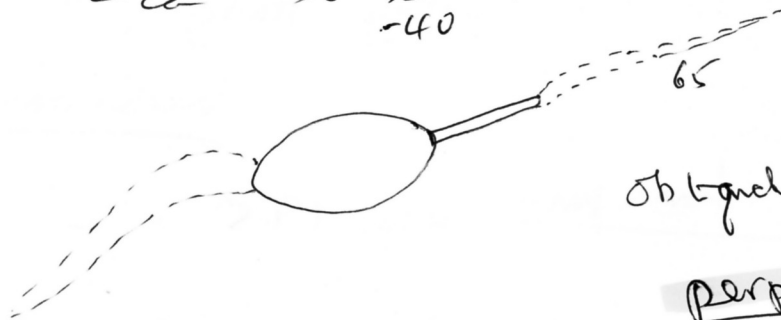

Setae / bifida ↓

~~Amnium~~ Setae hyaline all over (cf Pod. appendiculate)
up to ca 100 long. S. spread.

Podopara Spores clavate when young, ad with
primary appendages sp. 41-48 x 21-22.5

ca 30-32 x 3-5
-40

Lo apical
appendages

obliquely uniseriate.

perplexans ↓

20.10 I. canens ✓ Cp. seticeros ✓

P. perplexans ✓

P. A. Setae, physped

'blunt-nosed'

asci — widest below apex

Amnium leporinum

24.10 I. canens ✓ Cp. seticeros ✓

P. decipiens ✓

Pod perplexans ✓

Setae at neck hyaline

< 125

Sordaria sp. 26-29 x 16-14.5

Superba ♂

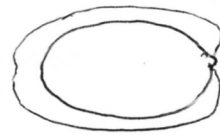

29.10 Collected from Cop. ~~stans~~

6.11 l. canis ✓

22-23 x 11-11.5

P. perplexus ✓

Sordaria superba ✓

29 x 16

Poly spored, sparsely setae
ascus, no apical stroke.

Podospore

round-headed

immature. Seta/bifida ✓

19.11 Sord. superba ✓

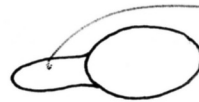

Podospore

Spores

19.5 -

21-22 x 12.5-13, with

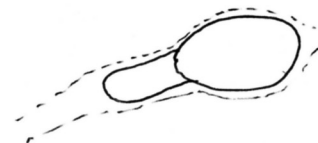

white broad ly app.

ca 12 x 5-6

radial crown of non-aggregated hairs
and web up to 150 long

128 spored? 24 apodges at clear?
ok for bifida ✓

Immature Cop. lanatuli ?
