

W16.15, N28.58. 615 m. Incubated 15.11.02.

15.11

19.11 -

24.11

Lasothius

St. carnos apothecae

Setae < 300

longitudinally elongated

exemplar cells. Asc 175 x 23.

Spores uniseriate ~~uniseriate~~ actually, → 1-2 seriate

16-16.5 x 11-12

Lasothius ✓

29.11

Lasothius apothecae pale carnos, up to

550 diam

Setae thin walled not wavy, < 200

exemplar cells longitudinally elongated - horizontal

Asc 25 diam Spores 1-2 seriate

Spores 16-17 x 11-11.5

Sarcobolus long < 200 hyaline wavy apothecae

Sur. 29 x 13. Spores smooth Asc 80 x 20

fused, with a few

large cracks giving some roughness 12.5-13 x 6-7.

8.12

Lasothius "neruiciformis" ✓depauperatus ✓

setae up to 220 long.

aseptate, inflated at base to 16.

Asc 16 diam

Apothecae pedicellate:-

Pores simple, cylindrical ca 2-3 diam.

Sarcobolus as above.Lasothius lasothoides ✓

18.12 L. lasiodermes ✓

Sacc. depauperatus ✓

26.12 L. lasiodermes ✓

Cap sexdecimspora ✓

Sacc. depauperatus ✓

Sp. 4 ER 48-55 x 9-10 fragmenting
intermedia ✓

White Coprus parvulus veil narrow, thin-walled
hyphal / & -erkulate, ht same phaeocytes present

31.12 Coprus spores v. dark saffronish ellipsoid,
rounded in some views  6 x 5 x 4
filamentifer ✓

Hypocrea immersed striking perithecia

stroma 0-limited. Spores narrow

ellipsoid, st. flattened in some views 24-27.5 x 10

obviously uniseriate
2nd hyaline cell visible in some spores -
immature & released. germ slit 14.5-19.5

Pore small, simple, blue in KI, covered
remaining blue.
annulata ?

9.1.03 Hypocrea ✓ spores 23-25.5 x 11-11.5

v. st. asymmetric in some views
g slit ca 13-16

no sign of second cell in spores discharged at neck.

22.1

Hypocarya

extended Spines v. st. flattened on

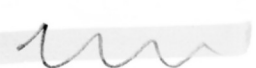

one side, no germ slit or 2nd cell visible

24 - 25.8 x 11.5 - 12.2

annulata ✓Sp - 4 ER

Two spine halves 13-14 x 4.8

= 27 x 4.8

if minima ✓Caryosfil/vein type real ? 

Ok. Spine cleaved as before 3.1.12

3.3

~~Delebia~~Caryos ✓

white - waxy looking apothecia

a bit like T. microspora but pores not from capsule

8-spined ellipsoid hyaline, base white 11.2 - 12.5 x 6.5 - 7

asci broad clavate 80-95 x 16-19 with

sterile stalked foot with blotched base, 'stalk' 10-20 long

pores uncinete, slender 22 diam, not or

hardly inflated at tips apothecia up to 275 diam

Dried 3.3 ,

H. annulata +Caryos sp

rest discarded - correct
