

2.3 Thel. polyspora ~~leucis~~ ~~atade~~ ~~later~~ See below

Ascozonus woolhyperi ✓ Ascii 110-120 x 24-29

Sp. nest 60-65 x 20-24
marginal hairs  < 30 x 4 short, inflated below to

2 small pure white apothecia ca 200 diam
spores fused 12.5-13 x 5

T. polyspora ✓ Pairs ascid. asci 85-110 x 40-55
Spore nest ca 64-80 x 38-45

Ascozonus ? imbricate, white apothecia ca 0.5 mm

pores abundant, imbricate 3-4 diam, v.v. st. inflated at tips or not at all.

Asci cylindrical ca 140-150 x 15 - not fully exerted - ca 30 ster of para tips. faint blue ink

Spores globose, not pigmented (yet?) 10-10.5-11 diam uniseriate no sign of ornamentation ✓

exclimulm phragm., 15-20 see later

7.3 - 31.3 Thelobolus stetzneri w/ Chondant.

Ascos 225 x 170 Spore ball 180 x 145.

Sp 6.5-7 x 4.5-5

P. lobatus v. Pale yellow ellipsoid spores 9-10 x 6-7
-11

8.4 T. stetzneri ✓ P. crystallinus ✓ Crystallinus ✓

Viemata & finicola ✓

R. polysporus ✓ Schizotrem lehanian ✓

immature. 11 sp good scales

Schizotrem immature. 8 sp good scales

ca 26 long. ✓ ?

Common ?

might even be clouded
check when sider.

Ascodia spores 27.5-29 x 12.5-13 basinate.

Ascodium straw colored

Ascodium feat. discoid

Ascos 340 x 32 excipulum 'dean' - not
K1+ noticeably scurfy? ✓
furfraces

Ascodia yellow apothecium - paraphyses also discoid

i.e. not albidus-like spores  12.5 x 6.5

K1+ paras green-filled, not capsule. to get seen crenulate

Also same clitocarpus Ascodia made - albidus?
K1+

2.4 V. fusca ✓

T. polyspora ✓

Sch. leucosporum ✓

A. albidus fine with

4 good + 4 abraded spores / areas
+ relatively uncracked sp. spore
Sp. 22.5 26-27 x 11.5-13-13.5

A. cretaceus ✓ dense grey-yellow paraphyses
Sp 11-12.5 x 6.5
-13

18.4 V. fusca ✓

Cephus stercoreus ✓

Asc. albidus ✓

Sch. leucosporum ✓

24.4 A. furfuraceus ✓

Asc. albidus ✓

Schizothecium S.sp. good scales 26 x 14.5

Conium ✓

30.4 Cp stercoreus ✓

Sch. good scales 8.sp
24-26 x 12.5-13

14 sp. 8x2

Conium ✓
