

incubated 26.3.03. E2.96, N43.61

27.3 - 313

Rypania "polyspora" immahe

asci clavate ca 85 x 30

4-5 in ascera.

Immahe Sardaria?

Immahe T. melobehitschka spores 24 long.

bispore ?

Immahe Sporospora 4 ER

5.4 Delitschia transverse septa, slightly

frond-parted spores 45 x 17.5-19.5
- 17.5

puberula ✓

8 Sardaria broad oval spores 22.5 x 15
- 24 - 16

10 gel, 5 very thin.

humana ✓

12.4 Sardaria 21-22.5 x 14.5-16 10 gel appeared
on paper humana ✓

Thelobolus stercorarius ✓

T. polyspora ✓

Schottzia tetrasporia ✓

Conochaeta short ~~setae~~ setae < 35 spores discoid
12.5-13 x 9-10 x 6 lyngbyi ✓

Sp. UER diagonal g. 8.5 $45 - 61.5 \times 8.5$
intermedia ? ✓

17.4 Coprinus uniser ✓

Sordaria perithecium on paper

ellipsoid, st. pointed papillate base. discernible gel,
wt not very broad. $19.5 - 21 \times 10 - 10.5$

Spores just about twice as long as wide.
not more than i.e. $2 < 2$ limicola ✓ ?

Another on paper near same pellet spore

rod ellipsoid 21×13.5 gel not apparent,
too narrow/small for humana ?

Another with sp. 16×9 ?

Another asc. $21 - 26$ diam, st. swollen centrally.

Sp. $24 - 25 - 26 \times 14.5$

18.4 Cop uniser ✓

Dehntschina ⁻⁵⁸ $48 - 54.5 \times 19.3 - 21$

Sch. tetrasporium ✓

Patagonica -

lunabe Sch. 8-sp. obovate uniseriate. Small scale
plantlet. wt husted = development - some scale cells
elongated, so looks spiky @ tip.

Sordaria 22.5 x 16 to spel humana ✓

274 Conochaeta lignaria ✓

Sp. UER 38.5-41.5 x 7.5-8 fragel g. slit
antrale ✓

Sec. Leptospora ✓

~~304~~ 1.5 Schizotheca an S-sp V. limited + small scales

ad brown mycelial hairy below 1 - partially 2 serial
21-22.5 x 13.5-14.5 ?

Mininghouse ✓
[see 10/03]

Sec. Leptospora ✓

Sp. antrale ✓

Con. lignaria ✓

T. nardelitsche

²¹⁻ Sp 23 x 8-8.5
brspora ✓

7.5 old fragated Sp. intermedia ✓

Sordaria ellipsoid, to strap-shaped section

Podospore ~~Ascom~~ ✓ many + 2y apposed.

Examine Sordaria, pale brown mycelial hairy all over
Dark rim of schizothecoid cells around neck

Sp. uniseriate 22.5-24 x 13.5-14.4 pedicel 8 x 2

12.5 T. brspora ✓

24-25 x 8
^{22.5-}

19.5 Conochaca 19-19.5 x 14-15 x 8

Scutigera ✓

Setae relatively short, < 50.

Con. hirsuta ✓ 11-12 x 9-10 x 7. Setae < 35

Sp. ✓ UER sp sl-48 x 8-9 diagonal g slit

26.5 Con. hirsuta - Con. scutigera -

4.6 Con Scutigera ✓ sp distinctly flattened

Discoid 18-19.5 x 14.5 x 8

Setae short < 30, but abundant around head & on upper half of tectum.

Con. hirsuta ✓ sp. flat discoid. 11-11.5 x 9.5 x 5.5

Sp UER 40-45-48 x 9-9.5 sigmoid diagonal g. slits

Deltochima p. atrofasciata

Discoid 4.6 with dense sp.
