

21.5 Coprus 4-sp to basal cystidia
Same as described sphaeroid on cap - old material
card spores  7-7.5 x 7-7.5 x 4
check later. Cardisporus ✓?

Laelobolus macrotrichus ✓ (as 25/03)

26.5 L. macrotrichus ✓

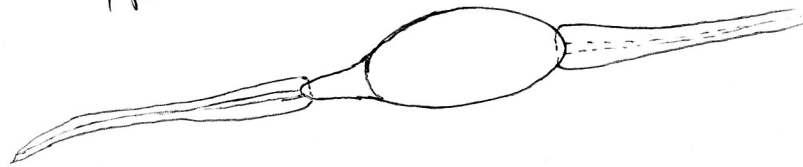

Sch. vesticaria ✓ 8-sp. basinate, poor scales
sp. 19-19.5 x 11-11.5

Cop. cardisporus ✓  

2.6 L. macrotrichus ✓

10.6 Cop. cardisporus ✓ L. macrotrichus ✓ Sch. vesticaria ✓

19.6 Cop. cardisporus ✓ Pod. appendiculata ✓ 690 tall x 500 diam
setae 1-2 septate, paler at tip, <60 long, uniformly distributed over whole surface.
spores 29-32 x 13-14.5, pedicel 8-11

Sch. vesticaria ✓ Lae. macrotrichus ✓

Ceroploma as 28/03 + 27/03, but not hairy
check later.

OTD Sporomniella verax?

Conochaeta polyaped. Colae 2100 Asc. clavate
 (28 x 35) blunt headed. ✓
 sp. 8-9 x 6-7 x 5-5.5. hansenii

Sp. 4 ER 41-42 x 8 antals ✓

28.6 Cap. cordispermus ✓ 4. sp. 8 x 7 x 5

Amium no setae. Asc. apical ring only just
 appment. sp. symmetrical. 39-41-45 x 19-21
 appedages structure less. madax?

Conochaeta hansenii ✓ very hooked setae on
 longish neck; < 125 long. Neck 2150 x 65
 spores 8-9 x 6-7 x 5

Pro. appendiculate ✓ Sch. vesticida ✓

78 Podopina multiaped simple setae & neck, very ragged
 or inflated. No pedicels Amium leptum
 sp 21-22.5 x 12.5

Amium madax ✓ Sch. vesticida - P. appendiculate ✓

21.7

P. appendiculata ✓

~~Cercopithecus sylvaticus~~

no apical glomere

Amim

39-41.5

x 20-21.5

mandax ✓

peristecium

with

no

lairs or setae

Diced 21.7 with 3 spp. above.
