

26.7.03. W2.73, N55.80.

NT543568.

27.7. -

30.7 -

2.8 Ascidium white forked apothecia
 450 diam. (unlike) Purple pigment
 and upper edge of excipulum
 paraphyses hyaline filamentous, 2.5 diam
 Ascii only just apparent

(unlike) Sordaria sp 25 x 14.5
 gel well formed?

3.8 Apothecium more white (unlike) diam, forked
 to small base. Excipulum st furcose with
 1 mycelial cells
 Ascii ca 160 x 16

sp. 12.5-14.5 x 7-7.5 uniseriate or first
 -15.5
 one-sided gel patches varied few 1-2 thin
 cracks to a small waked reticulum

Asc. Caribeni ✓

6.8 Sordaria narrow ellipsoid spores with
 v. wide gel (<5) in H₂O. sp.

Ascii 14-16 wide 19-20 x 10-10.5
 -21

Lundia ✓

13.8

A. calebanni ✓

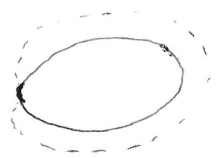

Smallest apothecium with

make asci 230 diam x 380 high

Asci 175-210 x 16-17 Spores brownish-

Sordaria well defined gel.

Sp. 22.5-25-26 x 14.5-19

Asci 300 x 32 - at expanded middle, 22-25 towards apex

Sporidia

20.8

Sporidia 4T imake

Sp. 29 x 5.5

asci 120 x 12-13 with short flexuose tapered base

Leposira

A. calebanni ✓

26.8

Immature Sporangia

11.9

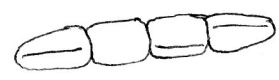

Sp. 4 ER 31-32 x 5 helving

minima

19.9

Sp. crowded tapering asci sp 33.5-35 x 4.5-6

germ slits short straight, none helving, ed cells v. sl. tapered

Leposira ✓

Dried 19.9 with Sp. leposira
