

7.9 Coprinus Sphaerocysts + setae < 30 long, tapered  
 pseudo 5 um high red & sh brown cap,  
 esp at centre, pale creamy towards margin  
 spores ellipsoid  10.5 - 15 x 6.5  
Leptomenes ✓

10.9. Cop. Leptomenes ✓ Cop. setigerus pseudo  
 wet headed Diphlephants - damp de gant.  
Plethorus spores 8 x 5.5 - 6,  
 pale yellowish en masse crystalline ✓  
 fixed head cell. Chains at least 4-spored.  
 spores shd cylindrical 4-5 x 3.  
 brown shd chate spores of lve. repens ✓

being chewed by larvae - may have to discard

14.9 Coprinus Setae + sphaerocysts 4-sp no focal cyst  
Leptomenes ✓

Ascobolus immersus ✓ Sp 61-70 x 30-32

Coprinus small lanthi spores ellipsoid 9.5-10 x 10.5  
 too small for naelatis, SL too big for 5.5-6.4  
pseudonaelatis ?

Ascobus white biserial sp 24-26 x 10.2-11.2

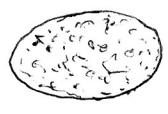

alb-dvs ✓

Sadaria sp 20.5-21 x 11.2-12.5 ellipsoid

st. papillate. clear gel, but not broadly  
expanding immediately

lim-dvs ✓

22.9 Ascobus

30 x 16.5-16  
-32

biserial

st. chasers

immature asc. clavate, 145 x 38.

Asc. alb-dvs ✓

Podospora deebias ✓ f-sp 38-42 x 14-19.5

26.9 Asc. immersus ✓ Asc. alb-dvs ✓

Telebas pygmaeus ✓

Telebas microstomus ✓

sp ellipsoid hyaline 7-8 x  
biserial 3-3.5

Asci 65 x 12.5-13

paras yellow green capsule

Discarded 26.9 poor correlation with larvae
