

W3.20, N55.84. NT251614

6.10 Lasitiales Spores basinate 22-23 x 13.5-14.5
 Ascii broad cylindrical 190 x 35-40
 Setae up to 200, not pretty inflated at base.
 horizontally elongated excipular cells con. wh ✓

12.10 Sch. ~~terrestris~~ ✓ Ascobolus alb. obs. ✓

Sch. ~~vesticula~~ f-sp. uniseriate 24-26 x 13.5-14
con. con. ✓ good scales

Sch. ~~vesticula~~ ✓ f-sp. , poor scales 16.5-18 x 9-9.5

Thelobolus ~~microsporus~~ ✓ yellow apothecia
 asci cylindrical clavate 50-55 x 10
 spores basinate 8 x 3.5 paras. green clavate
 heads to 6

20.10 Sch. ~~vesticula~~ - Pod. ~~decipies~~ f-sp
 38-39 x 19-19.5
 Reducte 60-65 x 6-8

Pilobolus spores pale ± colorless on moss
 ellipsoid 8-6 x 3 crystalline

27.10 Coprus ~~unser~~ ✓ Pod. ~~decipies~~ ✓
 large spherical immersed perithecia (immature).
 f-sp - Asium ? Podospore No setae or scales
Coprus white f-sp. 1-2 seriate sp. 12.5-13 x 8
 Ascii 95-100 x 14-16. cylindrical paras fine filaments verruca ✓

3.11 Cop miser ✓ Cop. ~~ster curus~~ ✓

Hairy imbed pedicel in. 1 umbr. ♂-sp. asc; im-spores clavate - pedicellate. Ascus top blunt, rounded to stroke, ca 32 wide.

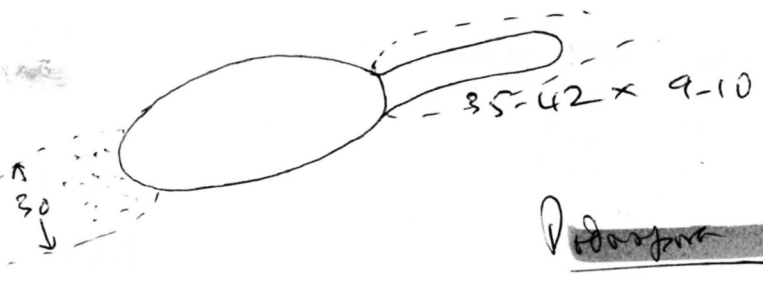

~~100 phans carrot~~ immature spores in ascus
 Smooth 21-22.5 x 10

Cop. ~~sexdecemsporus~~ ✓

22.11 Cop. ~~ster curus~~ ✓ Pod. ~~decipies~~ ✓ Cop. ~~sexdecemsporus~~ ✓

Brown hairy imbed pedicel. ♂-spores
 biseriate, [as 53/05] immature. No ascus apical
 + above 3.11
 stroke

Mature spore 58-67 x 29-26

~~Pod. ~~decipies~~~~ interstria

30.11 Apotecium 540 diam, very flat (stripate?)
 creamy with asc. Hymenial layer of dense parietic cells. no mature asc.

Pod. ~~decipies~~ ✓

4.12 P. ~~interstria~~ Cop. ~~Caradhi~~ paradisi ↓

6.12. Mature spores 12-13 x 6.5-8 = ~~100, 05~~

12.12.

12.12 Plank. fr. Pod. intestivacea ✓

Thin flat, pale-hyaline apotheca, centrally attached. < 1 mm diam
perianth column Commercial layer

ca 65 deep. No spores or asci seen.
appears to be covered with material on surface of hymenium

16.12 Pod. intestivacea ✓

Reddish-brown Coprus peridium?

2.1.04 Pod. intestivacea ✓

Coprus reddish brown peridium. Spores on

old adjacent stripe apex

8 x 8 x 5.5

Coprus ✓

Dried 2.1.04 with
abundant Pod. intestivacea
