

W3.08. N55.91. NT328682

41. very fresh - nil ✓  
10-1 Viamolidae Funicle ✓ Telebous ster conere

Psilobous pale long ellipsoid spms  
11 x 5, some more rounded 9.5-10 x 5-6 ✓

17.1 Finaria sp. 17.5-18.5 x 9-8.5  
brownish purple Cervaria ✓

Cephus Leptenus tapered setae, Sphaerocysts  
rough, brown

Ascobus alb-ovs 22-23 x 11 

Cep. stefanov

Pyxidophora Sp. 42-47 no pig ment patches on spms  
Ascical base ca 55 diam 190-160-110 long new fibrite ✓  
-65 reticuli?

Tonobous spms elongate ellipsoid 95 x 8  
setae up to 420 long. Zokali ✓

24.1 Ps.(F.)cervaria ✓ Cp. stefanov ✓ Cp. leptenus ✓

Semi-immersed branched perithecia long with short  
tips of hairs and sterile 400 diam x 550 tall  
hairs dark, puber towards tip, < 250 long, not  
aggregated, inflated & faciculate. Ascical contents not  
well differentiated. 250 x 35, no obvious spical smooth

8.3 Trichobrya Setae up to 350 Zicklii ✓

~~Sphaera~~ Uromyces funicis ✓

Lasrobrya Setae < 650 long + 32 wide at base

Spores (naked?) 22 x 8 ± uniseriate (some overlapping)

Asci cylindrical 15 wide

Perithecia dense 2-3 wide. excipulum all horizontally

elongated

macrotrichia ✓

Penthea immersed, with dense felt of brown hairs at vertex, not aggregated or inflated, or asymmetrically plane Podospira Asc: polyseriate

320 x 75 fused, no apical groove. Immature spores red-like, spindle-arrangement needs to make

11.3 Podospira still immature - immature spores

14.3 Cop. str. canis ✓ T. zicklii ✓

Podospira Spores 22.5 - 23 x 12.5 - 13.3

pedicel 12.5 - 13 x 6.5 or wider. 24 apertures not clearly seen bifida / scissile / transverse

Ascidium off-white minute apothecium sp lined 22.5 - 24 x 11 - 11.5 albidos ✓

17.3 T. zicklii ✓ Lepidaria macrotrichia ✓ V. funicis ✓ P. tenuis ✓

Dried 17.3 with abundant Pod. tenuis
