

25.6 Telebia asci 10-20 in apothecium
broad cylindrical clavate $6.5 \times 29-30$
sp ellipsoid $6-6.5 \times 3$ pores 3, not apical
excipulum brownish, of polygonal cells a. 6-10
spores uncountable? 150-200?
if dubius var. lagani

no apical striation

28.6 Telebia ✓ as above

Coniochaeta dark neck with rim of setae,
± hastate below. Asci broad clavate
 130×35 sp discoid $14-16 \times 13-15 \times 7$
setae < 50 long. Polynegetasma ✓

Sp. 4ER Asci $140-150 \times 20$

sp. $40-42 \times 7$ marginal germ slit. astrakis ✓

Telebia stefanov ✓

excipulum cells verobly
thi-wall ± other inflated when still v. young
 < 25 diam

1.7 Sp. astrakis ✓ Tel. stefanov ✓ Asc. albidus ✓

Con. Polynegetasma (H)

7.7 Coniochaeta lagani ✓ small discoid spores $12-13.5$
setae short, short at base, < 25 long $\times 9-9.5 \times$
 $5.5-6.$

A. abdos ✓ Schizotheca f-sp. 1 uniserial
numerous small scales with distinct 19-19.5
x 10

C. polyneuropelana ✓ Sp. abdos ✓
~~reticulate~~

9.7 White Cypris thin-well pinnae

Conocharta f-sp hirsuta ✓ A abdos ✓

Sp. abdos ✓

13.7 Conocharta, with crown of setae at neck, >
<25 long, ad covered all over with loose
matt of brown curly hyphae. f-sp

12.5-14.5 x 9.5-11.5 x 6-6.5 hirsuta ✓

matt ~~one~~ ^{two} without the matt of hyphae

6.8 Hypocypria ✓ f-sp 25.5-29 x 12.5-13

9.5-11 16-17-20 vestige of 2nd cell in

very young Spora - as another sample

Planospira?

? Stobase fecum, with long brown hairs flexuous
ca 350 diam. No spores

Con. hirsuta ✓

Trochodictya sp. 19-19.5 x 6.7

low-prominent germ pore. Cells relatively

conical monkii

Pale cream Strophomena / Psilonota pinacle

Camarotocha ✓ flat shape all over < 50 8-sp.
9.5-10 x 9.5-10 x 5

hymen? ✓ (check s. astrol.?)

Hypocopa ✓ spec 210-225 x 16

sp 22-22.5₋₂₆ x 10.6-12.5 9. slits 13-14.5

- this collection mostly smaller ellipsoid spines
2nd all in single spine KI pale reddish-brown

30.8 Hypocopa sp (19.5-) 23-25.5 x (10) 12-12.5 (H)

→ 5 slits 12.5-14 cf planispa ✓

sp 4 etc sp 41.5-45 x 7.5-8 astrol. ✓

Camarotocha sp discoid 11.2-14 x 9-8.5 x 5.5-6

flat shape all over < 60 hymen? ✓

KI pale dingy reddish/brown after
pale blue at first.

Dried 508 with Hypocopa, Camarotocha
+ sp. astrol.
