

25.6 - 28.6 Phycocapsa sp ellipsoid 7-14 x 5.5-7
columnella 17< high x 10< near apex, 9< below
blue-green ✓

P. lobata ± Colourless ellipsoid spores
9-10 x 6 crystalline ✓

1.7 Teleobrya setacea ✓

reddish Capsula pumila brown Sphaerocysts &
non-capitate setae Leptoneis ✓

Asc. albidus? parvula

7.7 Cep. Leptoneis ✓ Asc. albidus ✓

Thel. polygramma ✓ P. rosadana ✓ stromata

125 x 95, with 3 asc 84 x 32

9.7 Cep. Leptoneis ✓ Asc. albidus ✓

Saccobrya 3+3+2 sm 40-41 x 16. Sp 16 x 6.5-7
filament rough, but not massively thickened vesicular ✓

Sp 4 ER sp 51.5 - 54.5 x 10, intermedia ✓

13.7 Cep. Leptoneis ✓ Sch. vesicularis ✓ 4 pigmented spores +
A. albidus ✓ 20.5-21 x 9.5-10 4 unpigmented/ochreous

Sch. f. sp 1-2 seriate, good crown of small conium ?
scales or web 24-26 x 12.5-13

6.8 Hypocrepis ✓ velvety branched surface

rectrate ostiole 38-40 diam

sp. 26-30.5 x 12.5 g. slit 16-19.

spores of this, & other similar collections all v. slightly flat on one side - sl. protrusion

Sch. common ✓

Plumspora ?

15.8 Hypocrepis ✓ 2 pellets & med for (H). fly larvae

active - spawned. Dried block Shawa - velvety

gregarious but cycle perithecium

sp 27-29 x 12.8 g slit 16.

gel expands to 8-9 in H₂O

base tapering & pointing towards tip branched in KI

27.8 Podospora ✓ fly larvae still active

Discarded 27.8
