

19.9 Sp. minima ✓ as Tu/04

22.9 green Ascolobus picuride

Piptobryales Emg. crenate Spangophae. 

neospangophae 2 celled, food Spus 4 x 2.5
head cells spherical < diam.

Lepidura ✓

• Sp. minima ✓ (H)

27.9 yellowish green Ascolobus, crenate margin

sp 10.5-12.5 x 6-6.5
small asymmetric feet

paras yellowish-green

Crenulobus (H)

apo. < 2 mm diam

P. lepidura ✓

Sp. minima ✓

5.10 Ascolobus. discs low broader with age.

flat, centrally attached. sp 10-11.2 x 6.5

Crenulobus ✓

Immature peritrocha into large. Protopharynx ✓

Some setae of opercularia? Asc thin broad

Spines only just discoidal

Cannochorda v. short setae at neck, < 25 long

Sp small discoid 8-9 x 7.5-8 x 4 Larophora ✓

Sp 4 E? 32-35-38.5 x 6.5-7 g. slts ± parallel-oblique
rad cells not tapered

Some spores with combination of oblique & parallel perian slts
Leptina ? ?

13.10 - 26.10 Sordaria sp 25.5-27 x 16-17

5.11  A. cremulata

~~Spores~~

Sp 4 as above 4E with parallel g. slts & thick ascus base

Schizothecium imbricate

23.11 Sp 4E as above (5.10) Asc (60-175, tapered base. sp 35 x 6-6.5 round rad cells, g. slts ± straight

Schizothecium S-sp imbricate
sp broad ellipsoid 32-35 x 21-20

Asc: cylindrical 240 x 35 brown flexuous hairs ad small conical scales

glutinous ✓

Dried 23.11 with Sc. glutinos
+ Sporoc. illa
