

19.9 T. nodulata ~~dua~~ immature ✓ 18-
sp 19 x 5.5

Hypocopa ① Single fecal granule. The fecal body covered with white mycelium, + small ostiole.
 sp fused, sl. asymmetrical in some views
 24-26 x 9.5 g. slit ⁽¹³⁻⁾ 16- no 2nd cell (or sec. v. sl. hint in some young cells)
 pore ca 10 x 6, red-brown in KI chromoph ✓

Sarcosia albica ✓

22.9 Hypocopa ② large with fecal granule?
 sp. very similar to other collectors - 2nd cell in some, some asymmetry 19.5 x 21 x 7, ~~in + not~~
 fused germ slit full length: pore very faint
 brown in KI chromoph ✓

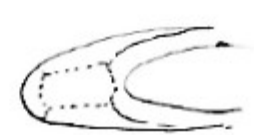

Pod. apiculata ✓ immature

Hypocopa ①
 pore red brown in KI

27.9. P. apiculata ^{parallel cells}
Sarcosia ✓

Sp. lanolinii primaria ✓

irregular polygonal, wall ca 5-10, fibrous-like
 no mature spores, but vesicles etc.

Hypocopa ① sp asymmetrical - fused 25.5-26 x 9.5
 pore KI true red-brown 10 x 6 

6.10 Pappadialata ✓ S. alvina ✓ T. munkii ✓

② Hypocapsa Spores discharged on paper
asymmetrical 18-19.5 x 6.5-7 second cell visible
germ slits not nearly visible but appear to
run about full length of outer edge of spore
in some

~~Cap. pseudocapsulata~~ ✓ Spores deduced.

12.10 Pappadialata ✓ numerous discharged Hypocapsa

spores 24-29 x 9.5-10 (120) but some with
irregularly broad ± flattened. Asymmetrical

g. slits not visible.
- sp v. black
chrysocephala ✓

Hypocapsa 2? ✓ sp 16.5 x 6.5 second cell visible
g slit short full length - difficult to see. young spores.

Small spores, but not small enough for parvula,
• does not look like parvula.

Asc: 175 x 16

S. alvina ✓

26.10 H. chrysocephala ✓ as above S. alvina ✓ Pappadialata ✓

Conocheata 8-sp. very small discoid

6.5-8 x 6.5 x 8 x 4.5

Short setae at neck < 25

reddish brown antheridia / pygidial excipula.

Asci ca 9.5 x 8.

Lecanopla

~~Lepidota~~

Hypocopa

one record cells visible.

Spores ellipsoid - asymmetric in one view

16-18 x 6.5-8.5 (9)

9 sets

13 - to much

larger

almost full length

pre-pole reddish brown in 1/3

not ± full length

4.11 P. apicalata ✓

S. alata ✓

T. mulleri -

Conocheata ✓ as above

23.11 P. apicalata -

Sp 4T as above

Sp with st. obtuse

9 sets

29-31 x 5

-32

Asci with tapered base
13 wide-spore, bisetate above.

Asci 10-12 x 4-5

OOO

Lepidota ✓

7.12 Hypocopa ✓

Conocheata ✓

14.12 Conocheata ✓

no Hypocopa ✓

Dried 14.12 3 Sp above, but in
poor condition
