

Deer (white-tailed)

Hare [forest] Hyytiala, Forest. Res. St. environs, Finland 86/04  
E24.28 N61.85. 25.8.04 [incubated 19.9.04]

20.9 V. fomicida ✓ 239 V. fomicida ✓

27.9 V. fomicida ✓

Green furfuraceous ~~apothecia~~ Asciobolus spores  
with ± non-anastomosing lines 12.5 x 6.5  
poor yellow green color. Centrally "shiplike"  
irregularly forked, some st. capitate granulatus ✓

Sordaria sp broad ellipsoid 17.5-19.5 x 12.5-12.5  
no clear gel ~~at the time in the~~  
Asci 17 wide. fomicida (see below) ✓

Telebia (Coprinus) Asc cylindrical 60-65 x 8.

Spores biserial ellipsoid, 8 x 3.5

ascidium polygam ca 8-10

~~apothecia~~ small ca 200, yellowish, h=12

green capitate pores (f. microspora)

pores thin < 2, flangeless, st. acute

Telebia ? ✓

5.10 A. granulatus ✓ V. fomicida ✓

Some larger spores also present 21 x 9.5 lined  
of furfuraceous/albicans. check later

Sordaria sp 21 x 11-11.5 good sel. fomicida ✓

13.10 V. fomicida ✓ S. fomicida ✓ Asciobolus small white

albicans like ~~apothecia~~ sp 16 x 8  
sandy with rounded ascus cells
