

Sheep [Dall's]. Pika camp, Ruby Range, Yukon T, Canada 100/04
 W138; N61. 12.8.04. Coll. student of D. Srivastava, inc 11.10.04. → Annee Peckham

14.10 — 20.10 Abundant, but still mature pure white
 aptera < 1.5 mm diam. furcifers external

Sp. 4 ER 42 x 9 ~~antennae~~ ✓ (rather broad?)

25.10 Ascobolus Clitellaria of A. immersus, with

yellowish-filled paraphyses Sp. relatively broad, with

minutely verrucose exospore 19-19.5 x 13-14,
 v. regular in size & shape. -20
 imbricate asci clavate 170-180 x 30,

broad above middle. The ped all round-ventral
 0.5-0.8 mm diam sp. L:W = 1.44 at esp: in D

Asci with colored spore 250 x 38 ~~Sp. see description~~
Ascobolus Lager & Scad aptera, pale but

st brownish with age 1.5-2 mm diam

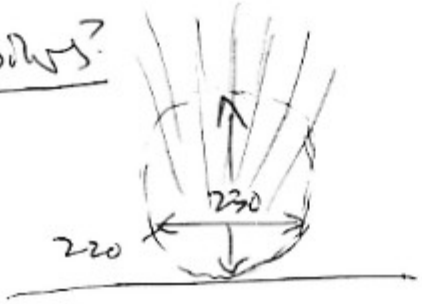

tuberculate sp. 18.5-19 x 8

uniseriate Paras hyaline, colorless, non-capitate 2-3 int
 Ke Bue. ~~sacchariform~~

~~R. polygona~~ ✓ ascus 77 x 32 Sp 42 x 9

Sp. ~~antennae~~ ✓ 4 ER Ascus 135 x 26. Sp

Laschiales?

Setae up to 500 x 25 at base
 tapering gradually, not inflated
 non-septate wall ca 2.5-3 thick.

only paraphyses present.
~~antennae~~

5.11 Ascobus  15.5-16.5 x 9
 cf ~~harmless / canini?~~
aglaospori

Selceobus 3+3+2 Sm 32 x 13
 sp smooth ellipsoid 10 x 6.
 Ascii 80 x 20 small apothecia < 250 diam
~~depapillate~~

Lasobus ✓
 selce < 340 x 30 at base
 wall 3 thick. Asc cylindrical
 < 20 wide. sp. uniseriate, ellipsoid, 17.5-19.5 x 9.5
Ciliates ✓

Check Sp. intermedia vs annulus.

23.11 Ascobus ✓  17.5-18 x 9.5
 "large" apothecia Saccharifera ✓
 sp. 4ER 51.5 x 9.5 intermedia ✓

Ascobus ✓  16-17.5 x 9.5-10 basinate,
 ascus 27 wide x 165 long. as 5.11
aglaospori ✓

Lasobus ✓
 asc. 22 wide x ca 200 horizontally elongated excysted cells
 selce thick walled (cf), walled just above base
 220-350 long Ciliates ✓

Seb. teleosporia ✓
